Title: NSPS for Surface Coating of Plastic Parts for Business Machines (Renewal).

ICR Numbers: EPA ICR Number 1093.10, OMB Control Number 2060-0162.

ICR Status: This ICR is scheduled to expire on January 31, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart TTT.

Owners or operators of the affected facilities must make an initial

notification report, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are also required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 35 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of facilities that apply surface coatings to plastic parts for use in the manufacture of business machines.

Estimated Number of Respondents: 10.

Frequency of Response: Quarterly and semiannually.

Estimated Total Annual Hour Burden: 979.

Estimated Total Annual Cost: \$94,725, which includes \$94,725 in labor costs, and neither capital/startup costs, nor operation and maintenance (O&M) costs.

Changes in the Estimates: There is an increase of one hour in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program change, but rather it is due to the fact that the current total of burden hours was rounded off to the next-highest whole number. There is an increase in costs for both the respondents and the Agency from the most recently approved ICR. The increase in burden cost is due to an increase in labor rates. This ICR uses updated labor rates from the Bureau of

Labor Statistics to calculate burden costs.

John Moses,

Director, Collection Strategies Division.
