SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision and extension of a currently approved information collection.

The Marine Mammal Protection Act (16 U.S.C. 1361 *et seq.*; MMPA), Fur Seal Act (16 U.S.C. 1151 *et seq.*; FSA), and Endangered Species Act (16 U.S.C. 1531 *et seq.*; ESA) prohibit certain activities affecting marine mammals and endangered and threatened species, with exceptions. Pursuant to section 104 of the MMPA and Section 10 of the ESA, special exception permits can be obtained for scientific research and enhancing the survival or recovery of a species or stock of marine mammals or threatened or endangered species. Section 104 of the MMPA also includes permits for commercial and educational photography of marine mammals; import and capture of marine mammals for public display; and, Letters of Confirmation under the General Authorization for scientific research that involves minimal disturbance to marine mammals. The regulations implementing permits and reporting requirements under the MMPA and FSA are at 50 CFR part 216; the regulations for permit requirements under the ESA are at 50 CFR part 222. The required information in this collection is used to evaluate the impacts of the proposed activity on protected species; to make the determinations required by the MMPA, ESA and their implementing regulations prior to issuing a permit; and to establish appropriate permit conditions. Inventory reporting pertaining to marine mammals in public display facilities is required by the MMPA.

This information collection applies to protected species for which NMFS is responsible, including the marine mammal species of cetaceans (whales, dolphins and porpoises), pinnipeds (seals and sea lions), sea turtles (in water), white abalone, black abalone, smalltooth sawfish, largetooth sawfish (imports only), shortnose sturgeon, and Atlantic sturgeon. The information

collection may be used for proposed listed species (e.g., corals).

The currently approved application and reporting requirements are being revised to include submission of Letters of Intent under the General Authorization via the existing online application system, Authorizations and Permits for Protected Species (APPS). Respondents can currently only apply for scientific research and enhancement permits using APPS. This revision also includes adding Atlantic sturgeon and largetooth sawfish. NMFS listed Atlantic sturgeon as endangered or threatened under the ESA on April 6, 2012 (77 FR 5914 and 77 FR 5580). Largetooth sawfish, which live outside of U.S. waters, were listed as endangered on August 11, 2011 (76 FR 40822). ESA Section 10 permits are required for taking or importing these ESA-listed species for scientific research or enhancement purposes.

A number of coral species have been proposed to be listed or reclassified under the ESA by NMFS (77 FR 73220). If such listings take effect, the scientific research and enhancement application instructions may be revised to clarify information pertaining to taking ESA-listed coral species. However, revisions pertaining to corals would not occur until and if a final listing rule was published.

II. Method of Collection

Permit applications, permit reports, and inventory reports are available in paper or electronic versions (online or via email). Respondents may submit all applications and forms by email, mail, or facsimile. Respondents may also submit scientific research and enhancement permit applications via an online application system, APPS.
