

claim for royalties. Allocation of the royalties collected occurs in one of two ways. In the first instance, these funds will be distributed through a negotiated settlement among the parties. 17 U.S.C. 111(d)(4)(A). If the claimants do not reach an agreement with respect to the royalties, the Copyright Royalty Judges ("Judges") must conduct a proceeding to determine the distribution of any royalties that remain in controversy. 17 U.S.C. 111(d)(4)(B).

On December 12, 2012, representatives of the Phase I claimant categories (the "Phase I Parties")¹ filed with the Judges a motion requesting a partial distribution of 50% of the 2011 cable royalty funds pursuant to Section 801(b)(3)(C) of the Copyright Act. 17 U.S.C. 801(b)(3)(C). Under that section of the Copyright Act, before ruling on a partial distribution motion the Judges must publish a notice in the **Federal Register** seeking responses to the motion to ascertain whether any claimant entitled to receive such royalty fees has a reasonable objection to the proposed distribution. Consequently, this Notice seeks comments from interested claimants on whether any reasonable objection exists that would preclude the distribution of 50% of the 2011 cable royalty funds to the Phase I Parties. The Judges must be advised of the existence and extent of all such objections by the end of the comment period. The Judges will not consider any objections with respect to the partial distribution motion that come to their attention after the close of that period.

The Judges also seek comment on the existence and extent of any controversies to the 2011 cable royalty funds at Phase I or Phase II with respect to those funds that would remain if the partial distribution is granted.

The Motion of Phase I Claimants for Partial Distribution is posted on the Copyright Royalty Board Web site at <http://www.loc.gov/crb>.

¹ The "Phase I Parties" are the Program Suppliers, Joint Sports Claimants, Public Television Claimants, Commercial Television Claimants (represented by National Association of Broadcasters), Music Claimants (represented by American Society of Composers, Authors and Publishers, Broadcast Music, Inc., and SESAC, Inc.), Canadian Claimants Group, National Public Radio, and Devotional Claimants. In Phase I of a cable royalty distribution proceeding, royalties are allocated among certain categories of broadcast programming that have been retransmitted by cable systems. The categories have traditionally been movies and syndicated television series, sports programming, commercial and noncommercial broadcaster-owned programming, religious programming, music, public radio programming, and Canadian programming. In Phase II of a cable royalty distribution proceeding, royalties are allocated among claimants within each of the Phase I categories.

Dated: January 15, 2013.

Suzanne Barnett,

Chief U.S. Copyright Royalty Judge.

BILLING CODE 7545-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-05154; NRC-2013-0009]

License Amendment Request for Analytical Bio-Chemistry Laboratories, Inc., Columbia, MO

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:

Peter J. Lee, Ph.D., CHP, Health Physicist, Materials Control, ISFSI, and Decommissioning Branch, Division of Nuclear Materials Safety, Region III

Office, U.S. Nuclear Regulatory Commission, Lisle, Illinois 60532; telephone: 630-829-9870; fax number: 630-515-1078; email at pjl2@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Materials License No. 24-13365-01 issued to Analytical Bio-Chemistry Laboratories, Inc. (the licensee), to authorize the release of the licensee's sanitary lagoon and the surrounding effluent discharge area for unrestricted use. Once released, these areas will no longer be subject to the license, and licensed activities will not be permitted therein. The licensee's facility is located at 7200 E. ABC Lane, Columbia, Missouri, approximately six miles east of Columbia and immediately north of I-70. The site is approximately 56 acres in size and is zoned as planned office, general industrial, and controlled industrial districts in central Boone County. The NRC has prepared the following environmental assessment (EA) of this proposed license amendment in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (NEPA), and Part 51 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions." Based on this EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. Therefore, the license amendment will be issued following the publication of the EA and FONSI in this notice.

II. Environmental Assessment

The licensee is a contract research organization that conducts research, development, and manufacturing of pharmaceuticals and agricultural chemicals. Operation at the licensee's site began in 1968. The licensee's facility is bounded by residential, agricultural and commercially zoned areas which appear to be in a stable phase of growth. The Missouri Department of Natural Resources (MDNR) issued Construction Permit number 26-1030 on May 15, 1986, authorizing the construction of a single 13,500 square foot surface lagoon with 540 linear feet of 2-inch diameter piping to accommodate an average flow of 10,000 gallons per day. The lagoon, application area and drain field were constructed on the west side of the site and comprised approximately 28 acres. The licensee's sanitary lagoon was operated from 1986 until 2004, at which
