SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act (44 U.S.C. 3501-3521) and OMB regulations at 5 CFR part 1320 provide that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number.

As required at 5 CFR 1320.8(d), the BLM published a 60-day notice in the **Federal Register** on September 4, 2012 (77 FR 53905), and the comment period ended November 4, 2012. The BLM received no comments. The BLM now requests comments on the following subjects:

While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

The following information is provided for the information collection:

Title: Mineral Surveys, Mineral Patent Applications, Adverse Claims, Protests, and Contests (43 CFR parts 3860 and 3870).

OMB Control Number: 1004-0025.

Abstract: On its face, the General Mining Law (30 U.S.C. 29, 30, and 39) authorizes a holder of an unpatented claim for hardrock minerals to apply for fee title (patent) to the Federal land (as well as minerals) embraced in the claim. Since 1994, a rider on the annual appropriation bill for the Department of the Interior has prevented the BLM from processing mineral patent applications unless the applications were grandfathered under the initial legislation. While grandfathered

applications are rare at present, the approval to collect the information continues to be necessary because of the possibility that the moratorium will be lifted.

Frequency of Collection: On occasion.

Description of Respondents: Owners of unpatented mining claims and mill sites upon the public lands, and of reserved mineral lands of the United States, National Forests, and National Parks.

Estimated Annual Burdens: 10 responses.

Estimated Hour Burden: 556 hours.

Estimated "Non-Hour Cost" Burden: \$173,600.

The "Non-Hour Cost" burden estimate includes \$13,400 for fixed document processing fees, \$1,200 for publication costs, and \$159,000 for case-by-case fees for validity examinations.

SUPPLEMENTARY INFORMATION: The BLM prepared the GJFO Draft RMP/Draft EIS to analyze and revise the current management decisions for public lands and resources within the GJFO planning area. The current management decisions for resources are described in the Grand Junction Record of Decision and Approved Resource Management Plan (RMP) (approved January, 1987), as amended (1987 GJFO RMP).

The GJFO planning area includes approximately 2.2 million acres of BLM, National Park Service, U.S. Forest Service, U.S. Bureau of Reclamation, state, local, and private lands located in northwestern Colorado, primarily in Mesa and Garfield counties, with additional small tracts located in Montrose and Rio Blanco counties. Within the GJFO planning area, the BLM administers approximately 1.1 million surface acres and 1.2 million acres of Federal oil and gas mineral (subsurface) estate. Surface management decisions made as a result of this Draft RMP/Draft EIS will apply only to the BLM-administered lands in the GJFO planning area.

The formal public scoping process for the GJFO RMP/EIS began on October 15, 2008, with the publication of a Notice of Intent in the **Federal Register**, and ended on January 9, 2009. The BLM held three scoping open houses in December 2008. The BLM held an additional six public workshops in February 2009 for travel management data collection to give the public the opportunity to review its route inventory for completeness and accuracy, as well as offer suggestions for possible reroutes or new routes that
