

proposed changes to the Liquidity Provider Sliding Scale will cause an unnecessary burden on intermarket competition because, while the proposed changes are designed to attract greater liquidity and trading volume, market participants trading on other exchanges can always elect to become TPHs on CBOE. Further, the Exchange exists in a competitive marketplace, and to the extent that these proposed changes make other exchanges less competitive with CBOE, market participants trading on those other exchanges can elect to trade on CBOE.

The Exchange does not believe that the proposed allotment of one CMI CAS Server for every 15 Trading Permits that a TPH holds (plus one total backup CAS Server regardless of the number of Trading Permits that a TPH holds) and the proposed fee of \$10,000 for each extra CMI CAS Server that a TPH requests will cause an unnecessary burden on intramarket competition because such allotment and fee will be applied to all TPHs accessing CBOE Command via a CMI connection. The Exchange does not believe such proposed allotment and fee will cause an unnecessary burden on intermarket competition because different exchanges have different systemic setups for connection to such exchanges and are likely not comparable or competitive.

It is not within the Exchange's position to determine whether the proposed changes to the listings of the FINRA WebCRDSM will cause any unnecessary burden on competition, as the Exchange does not establish, assess or collect such fees (FINRA does). The Exchange merely lists such fees on its Fees Schedule. That said, such increased fees will apply to all market participants (as they did before), and, to the Exchange's knowledge, apply to all other exchanges as well.

The Exchange does not believe that the proposed lower Non-Standard Booth Rental Fees will cause an unnecessary burden on intramarket competition because they will apply to all market participants who rent Non-Standard Booths. The Exchange does not believe that such fees will cause an unnecessary burden on intermarket competition because, while they are designed to encourage booth rental on and around the Exchange trading floor, which could encourage market participants to rent booths on CBOE's trading floor instead of that of other exchanges, each exchange has a different setup for its trading floor (some exchanges do not have trading floors at all), which makes a competitive comparison difficult. Further, market participants on such other exchanges can always elect to

trade on CBOE and rent such space here at CBOE.

The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange, and the Exchange believes that such structure will help the Exchange remain competitive with those fees and rebates assessed by other venues.
