SUPPLEMENTARY INFORMATION: The subject modification to Permit No. 17095, issued on April 11, 2012 (77 FR 21750), is requested under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

Permit No. 17095 currently authorizes the Permit Holder to: Monitor shortnose and Atlantic sturgeon abundance and distribution through the Hudson River Biological Monitoring Program (HRBMP) in the Hudson River from River Mile 0 (Battery Park, Manhattan, NY) to River Mile 152 at Troy Dam (Albany, NY). Researchers are authorized to non-lethally capture, handle, measure, weigh, scan for tags, insert passive integrated transponder and dart tags, photograph, tissue sample, and release up to 82 shortnose sturgeon and 82 Atlantic sturgeon annually. Additionally, researchers are permitted to lethally catch up to 40 shortnose sturgeon and up to 40 Atlantic sturgeon eggs and/or larvae (ELS) annually.

To account for a higher than expected catch per tow sampling performed authorized under Permit No. 17095, the Permit Holder now wishes to increase the takes authorized for of juvenile, sub-adult and adult Atlantic sturgeon to 200 fish per year. Take would not exceed a total of 600 Atlantic sturgeon captured over the permit life. The Permit Holder also requests that the sampling activities for juvenile, sub-adult and adult shortnose sturgeon and Atlantic sturgeon be expanded to include upper New York Harbor (~River Mile -2.0). The amount of lethal collection of Atlantic and shortnose sturgeon ELS would remain the same. The modification would be valid until the permit expires August 28, 2017.
