

terminated or completed VRAP. DOL will transmit each state's file on a weekly basis using a secure File Transfer Protocol (sFTP) site. Each state will be able to access only its file so that it can disseminate the participant information securely to the appropriate American Job Center staff in the participant's local area enabling the American Job Center to offer employment services to the veteran.

In order for DOL to ensure employment services are being offered and outcomes are being tracked for all participants, ETA is proposing to collect quarterly reports from the states, with a 45-day reporting period following each quarter, on the outreach offered to VRAP participants. In order to reduce the amount of participant information being transferred, ETA is proposing to add two data fields to the participant report it sends to the states. The report will be in Microsoft Excel format and will include a "unique identifier" field (not personally identifiable information), assigned by ETA and an "Employment Assistance" field which will be blank. The collection instrument is included as an attachment in the Information Collection Request package. The "Employment Assistance" field will be completed by the state workforce

agencies tracking the outreach offered to each VRAP participant. ETA is seeking approval from OMB to collect from each state the "unique identifier" field and the "Employment Assistance" field on a quarterly basis.

This information collection is subject to the Paperwork Reduction Act (PRA). A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

II. Review Focus

The Department is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
