*Title of Collection:* Private School Universe Survey 2013–16.

*OMB Control Number:* 1850–0641.

*Type of Review:* a revision of an existing information collection of a previously approved information collection.

*Total Estimated Number of Annual Burden Hours:* 6,410.

*Abstract:* The Private School Universe Survey (PSS) is the NCES collection of basic data from the universe of private elementary and secondary schools in the United States. The PSS is designed to gather biennial data on the total number of private schools, teachers, and students, along with a variety of related data, including: religious orientation; grade-levels taught and size of school; length of school year and of school day; total student enrollment by gender (K–12); number of high school graduates; whether a school is single-sexed or coeducational; number of teachers employed; program emphasis; and existence and type of its kindergarten program. The PSS includes all schools that are not supported primarily by public funds, that provide classroom instruction for one or more of grades K–12 or comparable ungraded levels, and that have one or more teachers. The PSS is also used to create a universe list of private schools that can be used as a sampling frame for NCES surveys of private schools. No substantive changes have been made to the survey or its procedures since its last approved PSS 2010–13. This clearance is for the 2013–14 and 2015–16 PSS data collections, and the 2015–16 PSS list- and area-frame building operations.

Dated: February 1, 2013.
