Information Collection Request

Title: Great Lakes Pilotage.

OMB Control Number: 1625-0086.

Summary: The Office of Great Lakes Pilotage is seeking a revision of OMB's current approval for Great Lakes Pilotage data collection requirements for the three U.S. pilot associations it regulates. This revision would require continued submission of data to an electronic collection system. This system is identified as the Great Lakes Electronic Pilot Management System which will eventually replace the manual paper submissions currently used to collect data on bridge hours, vessel delay, vessel detention, vessel cancellation, vessel moorage, pilot travel, revenues, pilot availability, and related data. This revision ensures the required data is available in a timely manner and allows immediate accessibility to data crucial from both an operational and rate-making standpoint. Additionally, this collection adds inclusion of a registration form (CG-4509) required to be completed by all registered and applicant pilots.

Need: To comply with the statutory and regulatory requirements respecting the rate-making and oversight functions imposed upon the agency.

Forms: CG-4509.

Respondents: The three U.S. pilot associations regulated by the Office of Great Lakes Pilotage and members of the public applying to become Great Lakes Registered Pilots.

Frequency: Daily, Weekly, Monthly, Quarterly, Semi-annually, Annually, On Occasion; frequency dictated by marine traffic levels and association staffing.

Burden Estimate: The estimated burden increases to 19 hours a year with the addition of CG-4509 to this collection.

Dated: February 13, 2013.

R. E. Day,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Command, Control, Communications, Computers and Information Technology.
