1. On Tuesday, October 9, 2012, the Wireline Competition Bureau (Bureau) announced the commencement of the Connect America Cost Model (CACM) virtual workshop to solicit input and facilitate discussion on topics related to the development and adoption of the forward-looking cost model for Connect America Phase II.

2. In addition, the Bureau has continued to develop CACM. The Bureau notes that while CACM shares common components with the CQBAT model, there are a number of differences between the CQBAT model and versions 1 and 2 of CACM. Specifically, version 1 of CACM uses updated input data, adds voice costs assuming carrier grade VoIP technology, enhances the Brownfield capability of the model, and includes fixed wireless broadband
providers using State Broadband Initiative data and a more accurate reflection of which areas are served by price cap carriers. Similarly, version 2 improves on version 1 by using updated residential, business, coverage, network topology, and study area data, as well as increasing reporting capabilities, modifying the hosting and processing environment, and expanding documentation and support files.

3. To date, parties have commented on 18 different topics in the virtual workshop, including whether any modifications to functionalities, capabilities, or data sets, not included in the versions of CACM released to date, should be addressed in or added to subsequent versions of the model.

4. The Bureau now seeks public input on additional questions relating to modeling voice capability and Annual Charge Factors (ACFs). The follow-up questions, which appear in the comment sections of the “Voice Capability” and “Determining the Annualized Cost of Capital Investments” topics, ask:

- Is it reasonable to model voice capability based on a per subscriber basis? Are there any alternative ways to model the cost?
- Are the specific inputs that CACM version two uses for the cost of voice capability reasonable? If proposing an alternative method, what specific sources and values should be used?
- Is the specific approach in CACM version two of calculating ACFs by taking into account the economic life of the assets using Gompertz-Makeham curves reasonable?
- Are the ACFs used in CACM version two reasonable?

5. Commenters should address these new questions focusing specifically on CACM version two. We encourage commenters to submit responses in the virtual workshop.

6. The Bureau may continue to add discussion topics or follow-up questions, which will be announced by Public Notice. Parties can participate in the virtual workshop by visiting the Connect America Fund Web page, http://www.fcc.gov/encyclopedia/connecting-america, and following the link to the virtual workshop.

7. The virtual workshop will take place over a period of weeks sufficient to allow public input on all material issues. Discussion of additional topics or follow-up questions may start and end at specific times that will be announced in advance. Comments from the virtual workshop will be included in the public record of this proceeding. The Bureau will not rely on anonymous comments posted during the workshop in reaching decisions regarding the model. Participants should be aware that identifying information from parties that post material in the virtual workshop will be publicly available for inspection upon request, even though such information may not be posted in the workshop forums.

I. Procedural Matters

A. Initial Regulatory Flexibility Act Analysis

8. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Bureau prepared an Initial Regulatory Flexibility Analysis (IRFA), included as part of the Model Design PN, 77 FR 38804, June 29, 2012, of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in these Public Notices and the information posted online in the Virtual Workshops. We have reviewed the IRFA and have determined that is does not need to be supplemented.

Although Virtual Workshop commenters may choose to provide identifying information or may comment anonymously, anonymous comments will not be part of the record in this proceeding and accordingly will not be relied on by the Commission in reaching its conclusions in this rulemaking. The Commission will not rely on anonymous postings in reaching conclusions in this matter because of the difficulty in verifying the accuracy of information in anonymous postings. [Docket No. 120627194–3097–01]

Highly Migratory Species; 2006 Consolidated Atlantic Highly Migratory Species Fishery Management Plan; Amendment 8

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: This proposed rule to implement Amendment 8 to the 2006 Consolidated Atlantic Highly Migratory Species (HMS) Fishery Management Plan (FMP) addresses North Atlantic swordfish commercial fishery management measures. In recent years, the North Atlantic swordfish stock has experienced significant growth due to ongoing domestic and international conservation measures designed to reduce mortality, protect juvenile swordfish, monitor international trade, reduce bycatch, and improve data collection. The most recent stock assessment, conducted in 2009, indicates that the North Atlantic swordfish population is fully rebuilt (“not overfished”) and overfishing is no longer occurring. Despite ongoing efforts to revitalize the U.S. North Atlantic swordfish fishery, domestic catches have remained below the U.S. North Atlantic swordfish quota allocated by the International Commission for the Conservation of Atlantic Tunas (ICCAT).

Fishing gears such as rod and reel, handline, harpoon, bandit gear, and green-stick are highly selective when compared to other gears, have low bycatch interaction rates with protected species and marine mammals, and may have low post-release mortality rates on non-target species and undersized swordfish. However, the current swordfish Handgear permit is a limited access permit, and is often difficult or expensive to obtain. Based upon the rebuilt status of North Atlantic swordfish, renewed interest in commercial handgears that are lower in bycatch and bycatch mortality, and the availability of swordfish quota, through Amendment 8 to the 2006 Consolidated HMS FMP NMFS proposes to provide additional commercial fishing opportunities for persons using swordfish handgears.

DATES: Written comments will be accepted until April 23, 2013.

ADDRESSES: You may submit comments on this proposed rule to implement Amendment 8 to the 2006 Consolidated Atlantic HMS FMP, identified by NOAA–NMFS–2013–0026, by any of the following methods:

The public hearings will be held in St. Petersburg, FL; Silver Spring, MD; Gloucester, MA; Fort Lauderdale, FL; and via a public conference call and webinar. NMFS will also hold a conference call and webinar on this proposed rule to consult with the HMS Advisory Panel (HMS AP) on April 18, 2013. These public hearings may be combined with public hearings for other relevant highly migratory species management actions. For specific locations, dates and times see the SUPPLEMENTARY INFORMATION section of this document.

- Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule may be submitted to Michael Clark, Highly Migratory Species Management Division, NMFS Office of Sustainable Fisheries, 1315 East-West Highway, Silver Spring, MD 20910, and by email to OIRA_submission@omb.eop.gov or fax to (202) 395–7285.

FOR FURTHER INFORMATION CONTACT: Rick Pearson at 727–824–5399; Michael Clark or Jennifer Cudney at 301–427–8503; or Steve Durkee at 202–670–6637.

SUPPLEMENTARY INFORMATION: Atlantic tunas and swordfish are managed under the dual authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and the Atlantic Tunas Convention Act (ATCA). Under the Magnuson-Stevens Act, NMFS must, consistent with the National Standards, prevent overfishing while achieving, on a continuing basis, the optimum yield (OY) from each fishery and rebuild overfished fisheries. Under ATCA, the Secretary of Commerce (Secretary) shall promulgate regulations as may be necessary and appropriate to carry out recommendations by ICCAT. The authority to issue regulations under the Magnuson-Stevens Act and ATCA has been delegated from the Secretary to the Assistant Administrator for Fisheries, NOAA (AA). On May 28, 1999, NMFS published in the Federal Register (64 FR 29090) final regulations, effective July 1, 1999, implementing the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks (1999 FMP). On October 2, 2006, NMFS published in the Federal Register (71 FR 58058) final regulations, effective November 1, 2006, implementing the 2006 Consolidated Highly Migratory Species (HMS) FMP, which details the management measures for Atlantic HMS fisheries, including the North Atlantic swordfish handgear fishery.
