The petition was filed more than a year after the publication of the ITC’s findings in the Federal Register.

The Department will conduct an investigation to determine whether or not the petitioning worker group has met the criteria set forth in Section 222(a) or (b) of the Trade Act of 1974, as amended, and will issue a determination accordingly.

Signed in Washington, DC, this 15th day of February, 2013.

Del Min Amy Chen,
Certifying Officer, Office of Trade Adjustment Assistance.

DEPARTMENT OF LABOR
Employment and Training Administration

U.S. Steel Tubular Products, Inc., McKeeport Tubular Operations Division, Subsidiary of United States Steel Corporation, McKeeport, PA; Notice of Initiation of Investigation To Terminate Certification of Eligibility

Pursuant to Section 221 of the Trade Act of 1974, as amended, an investigation was initiated in response to a petition for Trade Adjustment Assistance (TAA) filed on December 20, 2012 on behalf of workers of U.S. Steel Tubular Products, McKeeport Tubular Operations Division, Subsidiary of United States Steel Corporation, McKeeport, Pennsylvania (subject firm). The workers’ firm produces steel drill pipe and drill collars.

On January 28, 2013, the Department issued a certification stating that the criteria set forth in Section 222(e) of the Trade Act of 1974, as amended, was met.

A review of the determination and the petition, however, revealed that the certification was erroneously issued. Specifically, the determination inaccurately stated that the petition was filed within a year of the March 3, 2011 publication in the Federal Register of the International Trade Commission’s finding that dumping of drill pipes and drill collars from China negatively affects sales of these products in the United States.

The workers’ firm produces steel drill pipe and drill collars that are used in the oil and gas drilling industry, and the petition was filed more than a year after the publication of the ITC’s findings in the Federal Register.

The majority of these meetings will take place at NSF, 4201 Wilson Blvd., Arlington, Virginia 22230.

These meetings will be closed to the public. The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act. NSF will continue to review the agenda and merits of each meeting for overall compliance of the Federal Advisory Committee Act.

These closed proposal review meetings will not be announced on an individual basis in the Federal Register. NSF intends to publish a notice similar to this on a quarterly basis. For an advance listing of the closed proposal review meetings that include the names of the proposal review panel and the time, date, place, and any information on changes, corrections, or cancellations, please visit the NSF Web site: http://www.nsf.gov/events/. This information may also be requested by telephoning, 703/292–8182.

Susanne Bolton,
Committee Management Officer.

NATIONAL SCIENCE FOUNDATION
Proposal Review; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces its intent to hold proposal review meetings throughout the year. The purpose of these meetings is to provide advice and recommendations concerning proposals submitted to the NSF for financial support. The agenda for each of these meetings is to review and evaluate proposals as part of the selection process for awards. The review and evaluation may also include assessment of the progress of awarded proposals.

In the Matter of Luminant Generation Company LLC, Comanche Peak Nuclear Power Plant, Units 1 and 2; Order Approving the Proposed Internal Restructuring and Indirect Transfer of License

I

Luminant Generation Company LLC (Luminant, the licensee), is the holder of the Facility Operating License Nos. NPF–87 and NPF–89, which authorizes the possession, use, and operation of the Comanche Peak Nuclear Power Plant, Units 1 and 2 (CPNPP), and its Independent Spent Fuel Storage Installation Facility. CPNPP is located in Somervell County, Texas.

II

By application dated October 11, 2012, as supplemented by letters dated October 24, November 26, December 5,
