

would be conducted, (2) all identified individuals of any life stage of Morro shoulderband snail would be captured and moved out of harm's way to a Service-approved receptor site by an individual in possession of a current valid recovery permit for the species, and (3) a contractor and employee training program for Morro shoulderband snail would be developed and presented. To mitigate for unavoidable take, the applicants would contribute \$4,000 to an impact-directed environmental account held and administered by the National Fish and Wildlife Foundation. These funds would be used to implement recovery tasks identified in the *Recovery Plan for the Morro Shoulderband Snail and Four Plants from Western San Luis Obispo County, California* (USFWS 1998). The applicants would fund up to \$4,000, as needed, to ensure implementation of all of the minimization measures and reporting requirements identified in the HCP.

In the proposed HCP, the applicants consider two alternatives to the proposed action: "No Action" and "Project Design." Under the "No Action" alternative, an ITP for the Kelley-McDonough single-family residence would not be issued. The Kelly-McDonough single-family residence would not be built, and a contribution of in-lieu fees would not be provided to effect recovery actions for the Morro shoulderband snail. Since the property is privately owned, there are ongoing economic considerations associated with continued ownership without use, including payment of associated taxes. The sale of this property for purposes other than the identified activity is not considered economically feasible. Because of economic considerations and because the proposed action results in a net benefit for the covered species, Morro shoulderband snail, the No Action Alternative has been rejected.

Under the "Project Redesign" alternative, the project would be redesigned to avoid or further reduce take of Morro shoulderband snail. The onsite habitats occupied by Morro shoulderband snail are highly degraded in nature, and the parcel is not of sufficient size to accommodate a redesign that would substantially improve the conservation benefit to the species beyond what would be achieved in the proposed project. For these reasons, the alternate design alternative has also been rejected.

We are requesting comments on our preliminary determination that the applicants' proposal will have a minor or negligible effect on the Morro

shoulderband snail and that the plan qualifies as a low-effect HCP as defined by our Habitat Conservation Planning Handbook (November 1996). We base our determinations on three criteria: (1) Implementation of the proposed project as described in the HCP would result in minor or negligible effects on federally listed, proposed, and/or candidate species and their habitats; (2) implementation of the HCP would result in minor negligible effects on other environmental values or resources; and (3) HCP impacts, considered together with those of other past, present, and reasonably foreseeable future projects, would not result in cumulatively significant effects. In our analysis of these criteria, we have made a preliminary determination that the approval of the HCP and issuance of an ITP qualify for categorical exclusion under the NEPA (42 U.S.C. 4321 *et seq.*), as provided by the Department of Interior Manual (516 DM 2 Appendix 2 and 516 DM 8); however, based upon our review of public comments that we receive in response to this notice, this preliminary determination may be revised.

Next Steps

We will evaluate the permit application, including the plan and comments we receive, to determine whether the application meets the requirements of section 10(a)(1)(B) of the Act. We will also evaluate whether issuance of the ITP would comply with section 7(a)(2) of the Act by conducting an intra-Service Section 7 consultation.

Public Review

We provide this notice under section 10(c) of the Act and the NEPA public involvement regulations (40 CFR 1500.1(b), 1500.2(d), and 1506.6). We are requesting comments on our determination that the applicants' proposal will have a minor or negligible effect on the Morro shoulderband snail and that the plan qualifies as a low-effect HCP. We will evaluate the permit application, including the plan and comments we receive, to determine whether the application meets the requirements of section 10(a)(1)(B) of the Act. We will use the results of our internal Service consultation, in combination with the above findings, in our final analysis to determine whether to issue the permits. If the requirements are met, we will issue an ITP to the applicants for the incidental take of Morro shoulderband snail. We will make the final permit decision no sooner than 30 days after the date of this notice.

Public Comments

If you wish to comment on the permit applications, plans, and associated documents, you may submit comments by any one of the methods in **ADDRESSES**.
