Summary of Notice of Proposed Rulemaking

In the *Report and Order* released simultaneously with this *Notice of Proposed Rulemaking*, IB Docket No. 12-376, the Commission adopts footnotes to the Table of Allocations indicating that ESAA is an application of the FSS and may be authorized to communicate with GSO space stations of the FSS on a primary basis in the 11.7–12.2 GHz band (space-to-Earth), on an unprotected basis in 10.95–11.2 GHz and 11.45–11.7 GHz (space-to-Earth), and on a secondary basis in the 14.0–14.5 GHz band (Earth-to-space). A number of parties argue, however, that regulatory parity between ESV, VMES and ESAA suggests that ESAA as an application of the FSS should also be authorized on a primary basis in the 14.0–14.5 GHz uplink band. The Commission believes that the technical rules adopted in the *Report and Order* would support such a regulatory change. Accordingly, the Commission tentatively concurs with this recommendation and seeks comment on the proposal to elevate ESAA as an application of the FSS to primary status in the 14.0–14.5 GHz band (Earth-to-space) band. Specifically, we propose to revise non-Federal government (NG) footnote 55 to include a primary allocation for ESAA in the 14.0–14.5 GHz (Earth-to-space) band. The proposed footnote reads as follows:

NG55 In the bands 11.7–12.2 GHz (space-to-Earth) and 14–14.5 GHz (Earth-to-space), Earth Stations on Vessels (ESV), Vehicle-Mounted Earth Stations (VMES), and Earth Stations Aboard Aircraft (ESAA) as regulated under 47 CFR part 25 are applications of the fixed-satellite service and may be authorized to communicate with geostationary satellites in the fixed-satellite service on a primary basis.

This proposed footnote would grant primary status to ESAA in the 14.0–14.5 GHz band, and as a ministerial matter, would consolidate the text from footnotes NG54, NG183, and NG187, which the Commission proposes to eliminate. The Commission requests comment on these proposals, including on all costs and benefits. Further, the Commission also seeks comment on whether changing ESAA operations in the uplink band from secondary status
