Covered Area

The ITP covers a 290-ha (725-acre) wind generation facility including up to 25 turbines in Guayanilla, Puerto Rico. Puerto Rican crested toads have been observed in the Punta Ventana portion of the project. The Permittee proposes installation and operation of eight wind turbines in Punta Ventana over 79 ha (195 acres) that would affect about 5.1 ha (12.6 acres) of dry forest habitat. The revised HCP includes the site plan for the project and detailed information on the areas within Punta Ventana that would be affected by the construction and operation turbine sites, connecting roads, staging areas and connection to a substation.

Next Steps

We will evaluate the ITP amendment application, including the revised HCP and any comments we receive, to determine whether the amendment application meets the requirements of section 10(a)(1)(B) of the Act. We will also evaluate whether amendment of the section 10(a)(1)(B) ITP complies with

section 7 of the Act by conducting an intra-Service section 7 consultation. We will use the results of this consultation, in combination with the above findings, in our final analysis to determine whether or not to amend the ITP. If we determine that the requirements are met, we will amend the ITP to include the Puerto Rican crested toad as a covered species for incidental take.

Authority: We provide this notice under section 10 of the Act (16 U.S.C. 1531 et seq.) and NEPA regulations (40 CFR 1506.6).

Dated: February 15, 2013.

Kenneth A. Garrahan,

Acting Regional Director.

Notice of Availability of Final General Management Plan/Environmental Impact Statement for Effigy Mounds National Monument, Iowa

AGENCY: National Park Service, Interior.

ACTION: Notice of Availability.

SUMMARY: The National Park Service (NPS) announces the availability of the Final General Management Plan/Environmental Impact Statement (GMP/EIS) for Effigy Mounds National Monument (EFMO), Iowa.

DATES: The Final GMP/EIS will remain available for public review for 30 days following the publishing of the Notice of Availability in the **Federal Register** by the Environmental Protection Agency.

ADDRESSES: Copies of the Final GMP/EIS are available to the public by request by writing to the Superintendent, Effigy Mounds National Monument, 151 Highway 76, Harpers Ferry, Iowa 52146. The document is available on the internet at the NPS Planning, Environment, and Public Comment Web site at <http://www.parkplanning.nps.gov/indu.efmo>.

FOR FURTHER INFORMATION CONTACT:

Superintendent Jim Nepstad, Effigy Mounds National Monument, 151 Highway 76, Harpers Ferry, Iowa, at (563) 873-3491.

SUPPLEMENTARY INFORMATION: We, the NPS, have developed this GMP/EIS to guide the management of EFMO for the next 25 years. The Draft GMP/EIS considered three draft conceptual alternatives—a no-action and two action alternatives, including the NPS preferred alternative. The Draft GMP/EIS assessed impacts to cultural resources (archeological, landscapes, ethnographic resources, and museum collections), to natural resources (soils, wild and scenic rivers, vegetation, fish and wildlife, special status species, and visual resources/viewsheds), to visitor use and experience, to the socioeconomic environment, and to EFMO operations and facilities.

The preferred alternative in both the Draft GMP/EIS and Final GMP/EIS focuses on providing an enhanced visitor experience with increased understanding of EFMO while protecting and preserving natural and cultural resources. The desired visitor experience would be to make personal connections to EFMO's tangible resources through understanding of the

significance of the (pre-European contact) American Indian moundbuilding story and its relationship to the heritage of the region. The landscape and visitor facilities would support a contemplative atmosphere with opportunities for the public to spend time reflecting on the lives and legacy of the moundbuilders and the sacred nature of the site today. The natural setting created by preserving or restoring landscapes would provide a connection between the moundbuilding cultures and the environment that shaped their lives and beliefs.

New construction of facilities and trails at EFMO would be minimal under the preferred alternative. Using the direction provided in this plan, specific locations of trails in the Heritage Addition would be identified in a subsequent trail development plan. This plan envisions a small visitor contact station at the Sny Magill unit within an expanded boundary area. Once this land is acquired, subsequent site development planning would determine location and design of the station as well as of redesigned trails for Sny Magill.

Dated: July 18, 2012.

Regional Director, Midwest Region.

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Third Modification to Consent Decree Under the Clean Air Act

On February 22, 2013, the Department of Justice lodged a proposed third modification to a consent decree with the United States District Court for the Southern District of Ohio in the lawsuit entitled *United States, et al. v. American Electric Power Service Corp., et al.*, Civil Action Nos. 99-1182 (EAS) and 99-1250 (EAS).

Under a 2007 consent decree, American Electric Power Service Corp., et al. ("AEP") agreed to substantially reduce sulfur dioxide (SO₂) and nitrogen oxides (NO_x) from the AEP Eastern System which was then comprised of sixteen coal-fired power plants. The original consent decree requires AEP to install flue gas desulfurization (FGD) technology on Rockport Unit 1 by December 31, 2017 and on Rockport Unit 2 by December 31, 2019.
