SUPPLEMENTARY INFORMATION: The Questionnaire for National Security Positions, SF 86, housed in a system named e-QIP (Electronic Questionnaires for Investigative Processing), is an information collection completed by applicants for, or incumbents of, Federal Government civilian or military positions, or positions in private entities performing work for the Federal Government under contract. The collection is used as the basis of information:

- By the Federal Government in conducting background investigations, reinvestigations, and continuous evaluations, as appropriate, of persons under consideration for or retention in national security sensitive positions as defined in Executive Order 10450 and 5 CFR part 732, and for positions requiring eligibility for access to classified information under Executive Order 12968;
- By agencies in determining whether a person performing work for or on behalf of the Federal Government under a contract should be deemed eligible for logical or physical access when the nature of the work is sensitive and could bring about a material adverse effect on national security.

The SF 86 is completed by civilian employees of the Federal Government, military personnel, and non-federal employees, including Federal contractors and individuals otherwise not directly employed by the Federal Government but who perform work for or on behalf of the Federal Government. For applicants for civilian Federal employment, the SF 86 is to be used only after a conditional offer of employment has been made. It is estimated that 263,566 non-federal individuals, will complete the SF 86 annually. The SF 86 takes approximately 150 minutes to complete. The estimated annual burden is 658,915 hours. e-QIP is a web-based system application that currently houses electronic versions of the SF 86. This electronic data collection tool provides
