**SUPPLEMENTARY INFORMATION:** The FDIC is requesting comment on the following new proposed information collection:

*Title:* Annual Stress Test Reporting Template and Documentation for Covered Banks With Total Consolidated Assets of \$10 Billion to \$50 Billion Under the Dodd-Frank Wall Street Reform and Consumer Protection Act.

*OMB Control Number:* XXXXXXXX.

*Description:* Section 165(i)(2) of the Dodd-Frank Wall Street Reform and Consumer Protection Act <sup>1</sup> (Dodd-Frank

Act) requires certain financial companies, including state nonmember banks and state savings associations, to conduct annual stress tests <sup>2</sup> and requires the primary financial regulatory agency <sup>3</sup> of those financial companies to issue regulations implementing the stress test requirements. <sup>4</sup> A state nonmember bank or state savings association is a "covered bank" and therefore subject to the stress test requirements if its total consolidated assets are more than \$10 billion. Under section 165(i)(2), a covered bank is required to submit to the Board of Governors of the Federal Reserve System (Board) and to its primary financial regulatory agency a report at such time, in such form, and containing such information as the primary financial regulatory agency may require. <sup>5</sup> On October 15, 2012, the FDIC published in the **Federal Register** a final rule implementing the section 165(i)(2) annual stress test requirement. <sup>6</sup> This notice describes the reports and information required to meet the reporting requirements under section 165(i)(2) for covered banks with average total consolidated assets of \$10 billion to \$50 billion. These information collections will be given confidential treatment (5 U.S.C. 552(b)(4)).

The FDIC intends to use the data collected through these proposed templates to assess the reasonableness of the stress test results of covered banks and to provide forward-looking information to the FDIC regarding a covered bank's capital adequacy. The FDIC also may use the results of the stress tests to determine whether additional analytical techniques and exercises could be appropriate to identify, measure, and monitor risks at the covered bank. The stress test results are expected to support ongoing improvement in a covered bank's stress testing practices with respect to its internal assessments of capital adequacy and overall capital planning.

The Dodd-Frank Act stress testing requirements apply to all covered banks, but the FDIC recognizes that many covered banks with consolidated total assets of \$50 billion or more have been subject to stress testing requirements by the Board. The FDIC also recognizes that these banks' stress tests will be applied to more complex portfolios and therefore warrant a broader set of reports to adequately capture the results of the stress tests. These reports will
