Neal Smith National Wildlife Refuge, Jasper County, IA; Final Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of a final comprehensive conservation plan (CCP) and finding of no significant impact (FONSI) for the Environmental Assessment (EA) for Neal Smith National Wildlife Refuge (Refuge, NWR). In this final CCP, we describe how we intend to manage the refuge for the next 15 years.

ADDRESSES: You will find the final CCP, a summary of the final CCP, and the EA/

FONSI on the planning Web site: <http://www.fws.gov/midwest/planning/nealsmith/index.html>. A limited number of hard copies and CD-ROMs are available. You may request one by any of the following methods:

- *Email:* r3planning@fws.gov. Include “Neal Smith Final CCP” in the subject line of the message.

- *U.S. Mail:* Neal Smith National Wildlife Refuge, P.O. Box 399, 9981 Pacific Street, Prairie City, IA 50228.

FOR FURTHER INFORMATION CONTACT: Christy Smith, 515-994-3400.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we continue the CCP process for Neal Smith National Wildlife Refuge, which we began by publishing a notice of intent in the **Federal Register** (73 FR 76677) on December 17, 2008. For more about the initial process and the history of this refuge, see that notice. We released the draft CCP and EA to the public, announcing and requesting comments in a notice of availability (77 FR 50155) on August 20, 2012. The 30-day comment period ended on September 19, 2012. A summary of public comments and the agency responses is included in the final CCP.

Background

The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee) (Administration Act), requires us to develop a CCP for each national wildlife refuge. The purpose in developing a CCP is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System (NWRS), consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

Each unit of the NWRS was established for specific purposes. We use these purposes as the foundation for developing and prioritizing the management goals and objectives for

each refuge within the NWRS mission, and to determine how the public can use each refuge. The planning process is a way for us and the public to evaluate management goals and objectives that will ensure the best possible approach to wildlife, plant, and habitat conservation, while providing for wildlife-dependent recreation opportunities that are compatible with each refuge’s establishing purposes and the mission of the NWRS.

Additional Information

The final CCP may be found at <http://www.fws.gov/midwest/planning/nealsmith/index.html>. The final CCP includes detailed information about the planning process, refuge, issues, and management alternative selected. The Web site also includes an EA and FONSI, prepared in accordance with the National Environmental Policy Act (NEPA) (43 U.S.C. 4321 et seq.). The EA/FONSI includes discussion of four alternative refuge management options. The Service’s selected alternative is reflected in the final CCP.

The selected alternative focuses on increasing the amount and diversity of native vegetation on the refuge, and providing the varied habitat structure needed to support wildlife, especially declining populations of migratory grassland birds. Additional effort is directed toward restoring floristic quality on prairie and savanna remnants and monitoring and learning from the results of management actions. The refuge boundary is expanded to the east and west by 3,210 acres, to include all tributaries of Walnut Creek that flow through the refuge. A detailed description of objectives and actions included in this selected alternative is found in chapter 4 of the final CCP.

Christopher P. Jensen,

Acting Regional Director, Midwest Region, U.S. Fish and Wildlife Service.
