SUPPLEMENTARY INFORMATION: The U.S. Army Rock Island Arsenal requested a temporary deviation for the Rock Island Railroad and Highway Drawbridge, across the Upper Mississippi River, mile 482.9, at Rock Island, Illinois to remain in the closed-to-navigation position for a two hour period from 9 a.m. until 11 a.m. on May 18, 2013, while a run/walk is held between the cities of Davenport, IA and Rock Island, IL. The Rock Island Railroad and Highway Drawbridge currently operates in accordance with 33 CFR 117.5, which states the general requirement that drawbridges shall open promptly and fully for the passage of vessels when a request to open is given in accordance with the subpart.

There are no alternate routes for vessels transiting this section of the Upper Mississippi River.

The Rock Island Railroad and Highway Drawbridge, in the closed-to-navigation position, provides a vertical clearance of 23.8 feet above normal pool. Navigation on the waterway consists primarily of commercial tows and recreational watercraft. This temporary deviation has been coordinated with waterway users. No objections were received.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: March 1, 2013.

Eric A. Washburn,
Bridge Administrator, Western Rivers.

such deliveries are only accepted during the Regional Office normal hours of operation, and special arrangements should be made for deliveries of boxed information. The Regional Office official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

Instructions: Direct your comments to Docket ID No. EPA–R05–OAR–2012–0650. EPA’s policy is that all comments received will be included in the public docket without change and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or email. The www.regulations.gov Web site is an “anonymous access” system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through www.regulations.gov, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in www.regulations.gov or in hard copy at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Sam Portanova, Environmental Engineer, at (312) 886–3189 before visiting the Region 5 office.

SUPPLEMENTARY INFORMATION: Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA. This supplementary information section is arranged as follows:

I. What is being addressed in this document?

II. What are the changes that EPA is approving?

III. What action is EPA taking?

IV. Statutory and Executive Order Reviews.

I. What is being addressed in this document?

EPA is approving 326 IAC 2–7–10.5(b) as a revision to Indiana’s State Implementation Plan (SIP). This provision authorizes Indiana to issue construction permits to sources subject to the state operating permit program regulations at 40 CFR part 70. These provisions authorize the state to incorporate terms from Federal consent decrees or Federal district court orders into these construction permits. EPA is also approving public notice requirements for these permit actions. These rules will help streamline the process for making Federal permit procedures permanent and Federally enforceable.

DATES: This direct final rule will be effective May 14, 2013, unless EPA receives adverse comments by April 15, 2013. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the Federal Register informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2012–0650, by one of the following methods:

1. www.regulations.gov: Follow the on-line instructions for submitting comments.
2. Email: damico.genevieve@epa.gov.
3. Fax: (312) 385–5501.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Approval and Promulgation of Air Quality Implementation Plans; Indiana; Consent Decree Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving a portion of Indiana’s construction permit rule for sources subject to the state operating permit program regulations at 40 CFR part 70. These provisions authorize the state to incorporate terms from Federal consent decrees or Federal district court orders into these construction permits. EPA is also approving public notice requirements for these permit actions. These rules will help streamline the process for making Federal consent decrees and Federal district court order requirements permanent and Federally enforceable.

DATES: This direct final rule will be effective May 14, 2013, unless EPA receives adverse comments by April 15, 2013. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the Federal Register informing the public that the rule will not take effect.

SUPPLEMENTARY INFORMATION: Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA. This supplementary information section is arranged as follows:

I. What is being addressed in this document?

II. What are the changes that EPA is approving?

III. What action is EPA taking?

IV. Statutory and Executive Order Reviews.

I. What is being addressed in this document?

EPA is approving 326 IAC 2–7–10.5(b) as a revision to Indiana’s State Implementation Plan (SIP). This provision authorizes Indiana to issue construction permits to sources subject to the state operating permit program regulations at 40 CFR part 70 (part 70 sources) that include requirements from Federal district court orders of adjudication and Federal consent decrees. Permits incorporating these requirements are issued to sources that
II. What are the changes that EPA is approving?

On August 9, 2012, the Indiana Department of Environmental Management (IDEM) submitted a SIP revision request to EPA for revisions to the State’s part 70 construction permit rules. If approved, the first revision would allow provisions from Federal district court orders of adjudication and Federal consent decrees to be incorporated into construction permits issued to sources that are subject to title V of the CAA. The SIP submittal also included a second rule revision to include public notice requirements for these permitting actions. Indiana filed these rule revisions on February 6, 2012, and they became effective on March 8, 2012. The rule revision in 326 IAC 2–7–10.5(b) provides for the incorporation of control requirements and emission limits set forth in a Federal district court order that adjudicates violations or a Federal consent decree that is entered into for the purpose of resolving alleged violations of the following: (1) Prevention of significant deterioration provisions, (2) nonattainment new source review requirements, (3) Section 112(g) and 112(j) of the CAA, or (4) 326 IAC 20 (state rules for National Emission Standards for Hazardous Air Pollutants).

The rule revision in 326 IAC 2–7–10.5(k) requires that construction modification approval proceedings under 326 IAC 2–7–10.5 provide for adequate opportunity for public notice established in 326 IAC 2–1.1.6 and 326 IAC 2–7–17. 326 IAC 2–1.1.6 is a SIP-approved rule that contains public notice requirements for sources subject to 326 IAC Article 2. 326 IAC 2–7–17 is the portion of Indiana’s Federally approved title V program that contains public notice requirements for title V sources.

EPA has not previously undertaken rulemaking on 326 IAC 2–7–10.5, but has determined that the provisions of 326 IAC 2–7–10.5(b) and (k) are severable from other sections of that rule. Therefore, this approval does not affect the SIP approval status of the other portions of this rule. The provision in 326 IAC 2–7–10.5(b) allows IDEM to establish the provisions of Federal consent decree and Federal court order as Federally enforceable conditions in state-issued part 70 source construction permits, which are permits issued pursuant to programs approved under title I of the CAA. Upon their inclusion in the construction permits, the consent decree and consent order provisions become “applicable requirements” under 40 CFR 70.2, and will become part of a source’s title V permit through a title V permit modification. Once incorporated into a construction permit under 326 IAC 2–7–10.5(b), the Federal consent decree and consent order provisions will become permanently enforceable by both IDEM and EPA. It should be noted, however, that this rule does not cause these requirements to be incorporated directly into the SIP.

III. What action is EPA taking?

EPA is approving Indiana’s part 70 source construction permit rule provisions at 326 IAC 2–7–10.5(b) and 326 IAC 2–7–10.5(k). We are publishing this action without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comments. However, in the proposed rules section of this Federal Register publication, we are publishing a separate document that will serve as the proposal to approve the state plan if relevant adverse written comments are filed. This rule will be effective May 14, 2013 without further notice unless we receive relevant adverse written comments by April 15, 2013. If we receive such comments, we will withdraw this action before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on the proposed action. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. If we do not receive any comments, this action will be effective May 14, 2013.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is that of a rulemaking agency, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 23222, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other
mandating that certain railroads establish and maintain systems that allow members of the public to call the railroads, using a toll-free telephone number, and report an emergency or other unsafe condition at highway-rail and pathway grade crossings. This document amends and clarifies the final rule published in the proposed rules section of today’s Federal Register, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b).)

SUPPLEMENTARY INFORMATION:

I. Background

This rule implements Section 205 (Sec. 205) of the Rail Safety Improvement Act of 2008 (RSIA), Public Law 110–432, Division A, which was signed into law on October 16, 2008. Sec. 205 of the RSIA mandates that the Secretary of Transportation require certain railroad carriers (railroads) to take a series of specified actions related to setting up and using systems by which the public is able to notify the railroad by toll-free telephone number of safety problems at its highway-rail and pathway grade crossings. Such systems are commonly known as Emergency Notification Systems (ENS) or ENS programs. On March 4, 2011, FRA issued a notice of proposed rulemaking (NPRM) (76 FR 11992) that would require railroads to implement an ENS, through which they receive reports of unsafe conditions at crossings. See 76 FR 11992. A public hearing on the proposal was held on September 29,
