can be viewed electronically at: http://www.gpo.gov fdsys/pkg/FR-2002-08-02/html/02-19541.htm. The revised notice can be viewed electronically at: http://www.gpo.gov/fdsys/pkg/FR-2004-01-20/html/04-1131.htm. As a result of the retirement of the Trans Texas Corridor concept plan and change in the regional growth projections in the study area, it was determined that the travel demand in the Loop 9 project area would not warrant the project as originally proposed. TxDOT intends to conduct a feasibility study to determine a new direction for this transportation corridor. As a result, the above mentioned notices are rescinded. Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

In accordance with Part 235 of Title 49 Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by a document dated December 26, 2102, CSX Transportation, Inc. (CSX) seeks approval from the Federal Railroad Administration (FRA) for the discontinuance or modification of a signal system. FRA assigned the petition Docket Number FRA–2013–0018. CSX proposes to discontinue the use of, and to remove, the pipe-connected approach-locked derails at the Aberdeen & Rockfish Railroad Company’s (A&R) crossing at Milepost A210.62 in CSX’s Florence Division, South End Subdivision, in Fayetteville, NC. A&R, which operates the intersecting rail line, has been notified of the modifications. CSX has been granted approval, through an application in Docket Number FRA–2010–0160, for other modifications that it will make to the signal system at the A&R crossing in preparation for the installation of Positive Train Control. CSX intends to modernize this location by installing new microprocessor-based equipment, houses, and signals. The existing dwarf signals on A&R will be replaced with high signals for improved visibility and push-button operation. One way, low-speed diamond frog will also be installed at this location, limiting the speed on A&R to 10 mph or less.

A copy of the petition, as well as any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). 30-Day Notice and Request for Comments

AGENCY: Surface Transportation Board, DOT.

ACTION: 30-day notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3519 (PRA), the Surface Transportation Board (Board) gives notice that it is requesting from the Office of Management and Budget (OMB) approval of the information collection—System Diagram Maps—further described below. The Board previously published a notice about this collection in the Federal Register on January 17, 2013, at 78 FR 3968. That notice allowed for a 60-day public review and comment period. Comments may now be submitted to OMB concerning (1) whether the collection is necessary for the proper performance of the functions of the Board, including whether the collection has practical utility; (2) the accuracy of the Board’s burden estimates; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology when appropriate. Comments will be summarized and included in the Board’s request for OMB approval.
