

inapplicability of Section 1605 in the context of such systems. (See also **Federal Register** Volume 75, Number 119 (Tuesday, June 22, 2010), 35447–35449.)

Perkins+Will concluded that no VRF systems of the required scale were manufactured in the U.S.

In the absence of a domestic supplier that could provide a VRF system that meets or exceeds the design requirements of the SAFL renovation, the University of Minnesota requested that NSF issue a Section 1605 exemption determination with respect to the purchase of a foreign-supplied VRF that will meet the specific design and technical requirements that are necessary for the renovation of SAFL.

NSF's Division of Grants and Agreements (DGA) and other NSF program staff reviewed the University of Minnesota exemption request submittal and determined that sufficient technical information was provided in order for NSF to evaluate the exemption request and to conclude that an exemption is needed and should be granted.

III. Exemption

On March 15, 2013, based on the finding that no domestically produced variable refrigerant flow system meets all of the technical specifications and requirements of the St. Anthony Fall Laboratory renovation project and pursuant to section 1605(b), the NSF Chief Financial Officer, in accordance with a delegation order from the Director of the agency signed on May 27, 2010, granted a limited project exemption of the Recovery Act's Buy American requirements with respect to the procurement of the variable refrigerant flow system.
