

operation of wireless microphones in the core TV spectrum in conformance with the rules. The Commission anticipates that some wireless microphone users that previously operated in the 700 MHz band will have to purchase or lease new equipment capable of operating in the core TV spectrum. The point-of-sale disclosure requirement will help these consumers make an educated decision as they obtain new microphones, and it will help them operate in the core TV spectrum without causing harmful interference to other services in the spectrum. Further, a label on 700 MHz band wireless microphones bound for export will help to ensure that these wireless microphones are not made available for use in the United States, in contravention of our efforts to remove them from the 700 MHz band.

Title: Study Area boundary Maps Reported in Esri Shapefile Format, DA 12–1777.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 1,443 respondents; 1,443 responses.

Estimated Time per Response: 26 hours.

Frequency of Response: On occasion and biennial reporting requirements.

Obligation to Respond: Mandatory. Statutory authority for this information collection is contained in 47 U.S.C. section 254(b) of the Communications Act of 1934, as amended.

Total Annual Burden: 7,924 hours.

Total Annual Cost: \$705,935.

Privacy Impact Assessment: N/A.

Nature and Extent of Confidentiality: No questions of a confidential nature are asked.

Needs and Uses: The Commission will submit this expiring information collection to the Office of Management and Budget (OMB) after this comment period to obtain the three year clearance from them.

The Commission requires all incumbent local exchange carriers (ILECs) to file shapefile maps of their service territories in a state (study area) and allows state public utility commissions to file voluntarily such data on the behalf of ILECs. Shapefiles are a commonly used, digitized, geographic information system (GIS) format. Accurate and accessible maps are essential to the legitimate distribution of universal service support to rural, high cost carriers. After the shapefiles are uploaded into a web interface provided by the Commission,

each ILEC or state commission must certify the accuracy of its study area maps. ILECs or state commissions also must submit updated shapefile maps if the study area boundaries change, and must recertify the accuracy of the map every two years.

Title: Sections 68.105 and 1.4000, Promotion of Competitive Networks in Local Telecommunications Markets Multiple Tenant Environments (MTEs).

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions, Federal Government, and state, local or tribal government.

Number of Respondents: 7,367 respondents; 7,367 responses.

Estimated Time per Response: 26.3109814 hours.

Frequency of Response: On occasion reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. sections 151 and 224 of the Communications Act of 1934, as amended.

Total Annual Burden: 193,833 hours.

Total Annual Cost: N/A.

Privacy Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: The Commission will submit this expiring information collection after this comment period to obtain the full, three year clearance from the Office of Management and Budget (OMB). The Commission is requesting approval for an extension (no change in the reporting and/or third party disclosure requirements). The Commission is reporting a 451 hour decrease in burden which is due to adjustments over time because requests for location information would have already been made at most buildings.

This collection involves information regarding the location of the demarcation point, antennas placed on subscriber premises, and the state of the market. In an October 2001 Order (FCC 00–366), the Commission adopted the following:

(1) Prohibited carriers from entering into contracts that restrict or effectively restrict a property owner's ability to permit entry by competing carriers;

(2) established procedures to facilitate moving the demarcation point to the minimum point of entry ("MPOE") at the building owner's request, and requires incumbent local exchange carriers (LECs) to timely disclose the location of existing demarcation points where they are not located at the MPOE;

(3) determined that, under section 224 of the Communications Act of 1934, as amended, utilities, including LECs, must afford telecommunications carriers and cable service providers reasonable and nondiscriminatory access to conduits and rights-of-way located in customer buildings and campuses, to the extent such conduits and rights-of-way are owned or controlled by the utility; and

(4) extended to antennas that receive and transmit telecommunications and other fixed wireless signals the existing prohibition of restrictions that impair the installation, maintenance or use of certain video antennas on property within the exclusive use or control of the antenna user, where the user has a direct or indirect ownership or leasehold interest in the property.

Federal Communications Commission.
