FIFRA Pesticide Registration Review and ESA Consultation Processes; Stakeholder Input; Notice of Availability**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice.

SUMMARY: EPA is announcing the availability of the final paper describing enhanced opportunities for stakeholder input during its review of pesticide registrations under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and associated consultations under the Endangered Species Act (ESA). The paper was jointly prepared by EPA, the U.S. Department of Agriculture (USDA), and the National Marine Fisheries Service (NMFS) in the U.S. Department of Commerce and the U.S. Fish and Wildlife Service (USFWS) in the Department of Interior (collectively, the Services). The paper describes significant changes to EPA's registration review process intended to facilitate ESA pesticide consultations and coordination across these Federal agencies, and calls for a greater role for USDA. EPA accepted public comment on the proposed changes for 60 days, and then reviewed the comments received. Subsequently, EPA, USDA, and the Services revised the paper to outline specific roles and responsibilities for each agency, and to provide clarifying information on focus meetings and the timing for public input.

II. Background

EPA is announcing the availability of a document titled, "Enhancing Stakeholder Input in the Pesticide Registration Review and ESA Consultation Processes and Development of Economically and Technologically Feasible Reasonable and Prudent Alternatives." A copy of this document is available in the docket at <http://www.regulations.gov> under docket ID number EPA-HQ-OPP-2012-0442. The document describes changes to EPA's pesticide registration review program and how it conducts consultation with the Services under section 7 of the ESA. In an effort to be responsive to stakeholders' desires for a mechanism to get information into the registration review process as early as possible, EPA is holding "focus" meetings at the start of registration review for each active ingredient. In response to stakeholders' desires for a more open, reliable, and transparent pesticide consultation process, EPA will initiate any needed formal ESA consultations at a later stage in the review process. Consulting later in the registration review process allows EPA to develop more refined ecological risk assessments and to engage affected stakeholders in discussions that should result in more focused consultation packages inclusive of mitigation for listed species. There is a consensus that EPA and the Services should engage informally and early in the consultation process, but that formal consultation

should be reserved until EPA's ecological risk assessment and proposed decision are more fully formed. This approach has the potential to maximize the opportunity to effect changes that provide protections for species and their designated critical habitat, lessen the impacts on agriculture, and narrow the scope of the Federal action.

Additionally, the document describes EPA's plans to reach out to pesticide users potentially affected to discuss the technological and economic feasibility of reasonable and prudent alternatives (RPAs) intended to avoid jeopardy to threatened and/or endangered species. The USDA's relationships with the agricultural community provide a critical link between EPA's expertise on pesticides and the Services' expertise on listed species' locations, status and biology.

Finally, the document describes the process by which public comments received on RPAs will be summarized and organized by EPA and provided to the Services, who will prepare a document to be included in the administrative record of the consultation explaining how comments were considered, and if appropriate, how the final biological opinion was modified to address the comments. The Services will provide the document to EPA, and both the Services and EPA will make the document available to the public upon request. These process changes are intended to provide clarity and transparency to the ESA section 7 consultation process for pesticides.

Registration Review; Pesticide Dockets Opened for Review and Comment and Other Docket Acts

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: With this document, EPA is opening the public comment period for several registration reviews. Registration

review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. Registration review dockets contain information that will assist the public in understanding the types of information and issues that the Agency may consider during the course of registration reviews. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment. This document also announces the Agency's intent not to open registration review dockets for iodomethane or ethametsulfuron-methyl. Iodomethane and ethametsulfuron-methyl are undergoing phase-outs of all U.S. pesticide registrations. The cancellations of the iodomethane end use registrations became effective on December 31, 2012, and the cancellation of the sole technical product registration will become effective on December 1, 2015. The cancellations of all ethametsulfuron-methyl product registrations became effective on February 20, 2013. Therefore, iodomethane and ethametsulfuron-methyl are not scheduled for review under the registration review program.

This document also announces the registration review case closures for the pesticides alkyl amine hydrochloride (case #3051) and halofenozide (case #7425), and the availability of their respective Case Closure Documents. The cancellation of all alkyl amine hydrochloride registrations became effective on October 17, 2012. The cancellation of all U.S. halofenozide registrations became effective December 21, 2012. These case closure are being announced herein with no comment period.
