Petitioner: The Doe Run Company, 6854 Hwy KK, Bunker, Missouri 63629. 
Mine: Fletcher Mine, MSHA I.D. No. 23–00409, located in Reynolds County, Missouri.

Regulation Affected: 30 CFR 57.11052(d) (Refuge areas).
Modification Request: The petitioner requests a modification of the existing standard to permit the use of an alternative method of compliance to maintain compressed air cylinders in lieu of compressed air lines in refuge chambers. The petitioner states that:
(1) The refuge chamber would be provided with compressed air cylinders and a suitable regulator as well as always remain in the fresh air circuit of the mine’s ventilation.
(2) Bottled water will be maintained in the refuge chamber in lieu of waterlines as required by the standard.
(3) The refuge chambers are provided as a safety precaution in the event miners are unable to escape from the mine in an emergency.
(4) Three compressed air cylinders and bottled water for the refuge chamber will be available if needed during the mine emergency.
(5) The chamber will always remain in the fresh air, maintaining an acceptable air quality for an indefinite time period. Air and water lines may be damaged in the event of a mine emergency.

The petitioner asserts that having compressed air cylinders, the refuge chamber in the fresh air circuit of mine’s ventilation, and bottled water in the chamber, will always guarantee the miners affected no less than the same measure of protection afforded by the standard.
