

effectiveness of a mobile scalable device to detect the impairing effects of different drugs. The primary purpose of the data collected is to determine eligibility in a driving simulation study and to verify the effectiveness of the

experimental manipulations. The findings will provide valuable information concerning the utility and effectiveness of mobile, smartphone/tablet-based neurocognitive assessment that can provide a multifactorial

evaluation of cognitive functioning associated with impaired driving. OMB approval is requested for 18 months. There are no costs to respondents other than their time. The total annualized burden hours are 58.
