

CSB Investigators have determined that nineteen Chevron employees were engulfed in a vapor cloud formed by the hydrocarbon release. Eighteen employees escaped before the fire started, and one employee escaped without injury after the fire began. Six employees suffered minor injuries. More than 15,000 residents in the surrounding area sought treatment at area medical facilities as a result of the incident. Production at the Chevron facility was suspended for months following the accident.

Following the staff presentation the Board will hear brief comments from the public.

Following the conclusion of the public comment period, the Board will consider and may vote to approve the proposed interim report and safety recommendations.
