

practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: EPA would like to continue collecting notifications from gasoline retailers and wholesale purchaser-consumer related to commingling of ethanol blended and non-ethanol blended reformulated gasoline. The test results will allow EPA to monitor compliance with the Reformulated Gasoline Commingling Provisions. We inform respondents that they may assert claims of business confidentiality (CBI) for information they submit in accordance with 40 CFR Part 2203.

Form Numbers: None.

Respondents/affected entities:

Gasoline stations, Gasoline stations with convenience stores, Gasoline stations without convenience stores.

Respondent's obligation to respond: mandatory Sections 114 and 208 of the Clean Air Act (CAA), 42 U.S.C. 7414 and 7542.

Estimated number of respondents: 84,050.

Frequency of response: Annually.

Total estimated burden: 21,013 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$357,221 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in Estimates: The change in burden from the prior ICR is due in part to better numbers extracted from business and industry economic statistics that assisted in calculating the numbers of respondents. These better numbers reduced the party size by 13,650 members. The number of responses also declined from 110,700 to 84,050 a difference of 26,650 reports which reduced the industry burden hours from 27,675 to 21,013. We also found that the original cost per response was overstated by a factor of 2. With the

decline of respondents, burden hours and responses, and revisit cost per response, the cost to renew this ICR is \$357,221 a difference of \$528,379 calculated from the prior collection approved by OMB.

II. Background

This document is Federal Guidance Report No. 14 (FGR 14), “Radiation Protection Guidance for Diagnostic and Interventional X-ray Procedures.” It replaces Federal Guidance Report No. 9, “Radiation Protection Guidance for Diagnostic X-rays,” which was released in October 1976. Federal Guidance reports were initiated under the Federal Radiation Council (FRC), which was formed in 1959, through Executive Order 10831. A decade later its functions were transferred to the Administrator of the newly formed Environmental Protection Agency (EPA) as part of Reorganization Plan No. 3 of 1970. Under these authorities it is the responsibility of the Administrator to “advise the President with respect to radiation matters, directly or indirectly affecting health, including guidance for

all Federal agencies in the formulation of radiation standards and in the establishment and execution of programs of cooperation with States.” (42 U.S.C. 2021(h)) While EPA believes that this guidance will be useful to the broader medical community, the recommendations in FGR 14 are specifically directed to the use of diagnostic and interventional x-rays in federal facilities. A draft version of FGR 14 is now available for review and comment. It can be found on the agency’s Radiation Protection Web site at: <http://www.epa.gov/radiation>.
