SUPPLEMENTARY INFORMATION:

Background

The Billfish Conservation Act of 2012 (BCA), Public Law 112-183, 16 U.S.C. 1827a, was signed into law on October 5, 2012. The BCA defines "billfish" as any of the following: (1) Blue marlin; (2) striped marlin; (3) black marlin; (4) sailfish; (5) shortbill spearfish; (6) white marlin; (7) roundscale spearfish; (8) Mediterranean spearfish; or (9) longbill spearfish. It exempts swordfish from the definition of billfish.

Section 4(a) of the BCA prohibits any person from offering billfish or billfish products for sale, selling them, or having custody, control, or possession of them for purposes of offering them for sale. It treats a violation of the BCA as an act prohibited by section 307 of the Magnuson-Stevens Fishery Conservation and Management Act (MSA; 16 U.S.C. 1857). Individuals, including recreational fishermen may possess, but not sell billfish or billfish products or have custody, control, or possession for the purposes of offering them for sale, subject to limits imposed by existing state and federal regulations.

Section 4(c) of the BCA exempts billfish caught by U.S. fishing vessels and landed in Hawaii or Pacific Insular

Areas (as defined under the MSA) from the general prohibitions on sale and custody with the intent to sell in section 4(a). It also exempts billfish landed by foreign vessels in the Pacific Insular Areas and exported to markets outside the U.S. or retained within Hawaii and the Pacific Insular Areas for local consumption.

In passing the BCA, Congress recognized the conservation challenges facing billfish populations in the Atlantic and Pacific Oceans. Congress found that, despite careful management of domestic billfish fisheries, global billfish populations have declined significantly because of overfishing primarily through retention of bycatch by non-U.S. fishing fleets. See 16 U.S.C. 1827a note. In 2011, the International Union for the Conservation of Nature classified blue and white marlin as vulnerable to extinction and striped marlin as near threatened. The over harvest and export of billfish from foreign nations threatens the survival of billfish populations and the sustainability of the U.S. recreational billfish fishery. A report on trade of billfish published by the International Game Fish Association (IGFA) in June, 2007 found that the legal sale of billfish caught in the Pacific Ocean may create a market that allows billfish caught in the Atlantic Ocean to enter illegitimately into U.S. markets.

Existing federal regulations require the release of all Atlantic billfish caught by commercial fishing operations in the U.S. Exclusive Economic Zone (EEZ), prohibit the possession of billfish onboard commercial fishing vessels inside the U.S. EEZ, and prohibit the sale of Atlantic billfish. 50 CFR 635.21(a) and (e)(2), 635.31(b). The BCA increases the protection for Atlantic billfish by prohibiting the import and sale of all billfish in the U.S., no matter where harvested, unless exempted pursuant to section 4(c) of the BCA.

The only U.S. commercial fishery for billfish occurs in Hawaii and surrounding Pacific island areas. Section 4(c)(1) of the BCA exempts billfish caught by U.S. vessels and landed in Hawaii or Pacific Insular Areas from the general prohibition on sale of billfish. Under existing regulations, seafood dealers and processors are required to use the Billfish Certificate of Eligibility (COE) to document that billfish possessed or offered for sale were not harvested from the Atlantic Ocean. See 50 CFR 635.31(b). NMFS is considering adapting the billfish COE requirements to implement the BCA by requiring that seafood dealers and processors document that billfish offered for sale
