**FOR FURTHER INFORMATION CONTACT:** For additional information, contact Bill Richardson at (215) 814-5675.

**SUPPLEMENTARY INFORMATION:** Section 303(d) of the Clean Water Act requires that each State identify those waters (called "water quality limited segments") for which existing technology-based pollution controls are not stringent enough to attain or maintain State water quality standards. For those waters, States are required to establish TMDLs according to a priority ranking.

EPA's Water Quality Planning and Management regulations include requirements related to the implementation of Section 303(d) of the CWA (40 CFR 130.7). The regulations require States to assemble and evaluate existing and readily available water quality data and to identify water quality limited waters still requiring TMDLs every two years. The lists of waters still needing TMDLs must also include priority rankings and must identify the waters targeted for TMDL development during the next two years (40 CFR 130.7).

Consistent with EPA's regulations, EPA received West Virginia's submittal of its listing decisions under Section 303(d)(2) on December 21, 2012. On

March 25, 2013, EPA partially approved West Virginia's 2012 listings of waters and associated priority rankings and partially disapproved West Virginia's submission to the extent that West Virginia did not list 255 water quality limited segments. EPA solicits public comment on the addition of these waters to the State's list, as required by 40 CFR 130.7(d)(2).

Dated: March 28, 2013.
