SUPPLEMENTARY INFORMATION:

I. Background

The Department of the Interior (DOI), National Park Service (NPS) maintains the “Commercial Use Authorization (CUA) System—NPS–24” system of records. The purpose of this system is to manage the NPS Commercial Services Program allowing commercial uses within a unit of the National Park System, and to monitor resources that are or may be affected by the authorized commercial uses. The system will also be used to protect the natural and cultural resources of the national parks, and will provide the public the description and contact information for businesses that provide services in national parks.

The system will be effective as proposed at the end of the comment period (the comment period will end 40 days after the publication of this notice in the Federal Register), unless comments are received which would require a contrary determination. DOI will publish a revised notice if changes are made based upon a review of the comments received.

II. Privacy Act

The Privacy Act of 1974, as amended, embodies fair information principles in a statutory framework governing the means by which Federal Agencies collect, maintain, use, and disseminate individuals’ personal information. The Privacy Act applies to information that is maintained in a “system of records.” A “system of records” is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. The Privacy Act defines an individual as a U.S. citizen or lawful permanent resident. As a matter of policy, DOI extends administrative Privacy Act protections to all individuals. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DOI by complying with DOI Privacy Act regulations, 43 CFR part 2.

The Privacy Act requires each agency to publish in the Federal Register a description denoting the type and characteristic of each system of records that the agency maintains, the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such records within the agency. Below is the description of the NPS “Commercial Use Authorization (CUA) System—NPS–24” system of records.

In accordance with 5 U.S.C. 552a(r), DOI has provided a report of this system of records to the Office of Management and Budget and to Congress.

III. Public Disclosure

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: March 19, 2013.

Felix Uribe, Privacy Act Officer, National Park Service.
