### Federal Energy Regulatory Commission

[Project No. 14484-000]

#### Archon Energy 1, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On January 25, 2013, the Archon Energy 1, Inc., filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Kaweah River Drop 1 Hydroelectric Project (Kaweah River Drop 1 or project) to be located on Kaweah River, near the city of Woodlake, Tulare County, California. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project has two installation option alternatives; an in-stream method and a short diversion method. The in-stream option would consist of the following: (1) A gated water intake canal; (2) a 70-foot by 55-foot by 35-foot turbine structure enclosing two in-stream VLH turbine generators operating at 500 kilowatts kW; and (3) appurtenant facilities. The short diversion method would consist of the following: (1) a gated water intake canal; (2) a concrete trough diversion channel approximately 30 feet wide and 150 feet in length; (3) a 70-foot by 55-foot by 35-foot turbine structure enclosing four screw turbine generators operating at 250 kW; and (4) appurtenant facilities. The proposed project would have a total installed capacity of 1 megawatt and generate an estimated average annual energy production of 5,000 megawatt-hours by diverting existing stream flow into the diversion canal.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-9798-8]

### Clean Water Act: Availability of List Decisions

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice and initial request for public input.

**SUMMARY:** The Clean Water Act requires that States periodically submit, and EPA approve or disapprove, lists of waters (called "Section 303(d) lists") for which existing technology-based pollution controls are not stringent enough to attain or maintain State water quality standards and for which total maximum daily loads (TMDLs) must be prepared. Waters identified on Section 303(d) lists are called "water quality limited segments." This notice announces EPA's proposal to include in West Virginia's Section 303(d) list certain water quality limited segments and requests public comment.

On March 25, 2012 EPA partially approved West Virginia's 2012 Section 303(d) list of water quality limited segments and associated pollutants and partially disapproved West Virginia's submission to the extent that West Virginia did not identify certain water quality limited segments. EPA proposes to identify these additional water quality limited segments for inclusion on the State's 2012 section 303(d) list. The proposed water quality limited segments are identified in Enclosure 3
