On April 4, 2013, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Eastern District of Missouri, in the lawsuit entitled *United States v. The United States filed this lawsuit under the Clean Air Act (CAA), 42 U.S.C. Sections 7412(r)(7) and 7413 (b)(2), for noncompliance with the requirements of the chemical accident prevention provisions of the CAA, including failure to test or replace safety relief valves, improperly co-located gas-fired boilers and ammonia compressors, and other failures to abide by the Risk Management Program (“RMP”) requirements of Section 112(r)(7) of the Act. The proposed Consent Decree, which resolves all of these claims, requires Tyson to undertake extensive measures to ensure compliance with RMP regulatory requirements, including comprehensive third-party audits of RMP components at all 23 Tyson facilities within Missouri, Kansas, Iowa, and Nebraska. Tyson is required correct any violations found within specified periods of time and certify the completion of that work.

Tyson will also audit each facility to determine the thickness of threaded piping connections used in its refrigeration systems. Tyson will replace and/or otherwise correct any non-compliant piping it finds in its facilities.

Tyson must also pay a civil penalty of \$3,950,000 and undertake a supplemental environmental project. Tyson will purchase and deliver emergency equipment that is relevant to responses to emergencies involving chemicals that are regulated pursuant to the CAA Risk Management Program, to fire departments in the affected communities within 180 days after the Effective Date of the Consent Decree.

The Consent Decree provides Tyson with a release for the RMP violations alleged in the Complaint, and for other RMP violations uncovered by the audits that Tyson fully and timely corrects pursuant to the Consent Decree.
