The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the route and replacing them with RNAV waypoints. This action enhances the safety and efficiency of the National Airspace System (NAS).

DATES: Effective date 0901 UTC, June 27, 2013. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

SUPPLEMENTARY INFORMATION:

Background

The FAA published in the Federal Register a notice of proposed rulemaking (NPRM) to modify T–266 in the state of Alaska (78 FR 4353, January 22, 2013). Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal. Two comments were received.

Discussion of Comments

One commenter wrote that moving the RADKY fix, as proposed, would require revision of the JUNEAU FOUR Departure procedure that serves the Juneau International Airport. The commenter noted that other waypoints being added to T–266 also form part of special Capstone low level route R2015 and any future modification of those points could require reissuance of the special Capstone charts.

The FAA will amend all procedures affected by the relocation of the RADKY fix. Additionally, there are no plans to modify waypoints associated with route R2015.

Another commenter stated that more information should be provided regarding how pilots would benefit from the change. The commenter also questioned whether plans to remove/reduce the number of NDBs within the NAS was the driving cause for the change.

The current high track of T–266 consists of two minimum en route altitudes (MEA): 6,500 feet MSL between the Coghlin Island NDB and the Frederick’s Point NDB; and 6,200 feet MSL between the Frederick’s Point NDB and the Annette Island VOR. The modified track of T–266 uses a portion of Capstone route R2015. The segments on R2015 have MEAs ranging from 4,500 feet MSL to

Environmental Review

The FAA has determined that this action is categorically excluded from further environmental documentation according to FAA Order 1050.1E, Environmental Impacts: Policies and Procedures, in accordance with paragraph 311a. The implementation of this action will not result in any extraordinary circumstances in accordance with FAA Order 1050.1E paragraph 304.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

Federal Aviation Administration

14 CFR Part 71

RIN 22190–A866

Modification of Area Navigation (RNAV) Route T–266; AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies low-altitude RNAV route T–266 in the state of Alaska by removing two non-directional beacons (NDB) as the navigation signal source for segments of the route and replacing them with RNAV waypoints. This action enhances the safety and efficiency of the National Airspace System (NAS).

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9W, Airspace Designations and Reporting Points, dated August 8, 2012, and effective September 15, 2012, is amended as follows:

Paragraph 6011 United States area navigation routes

* * * * *
support the expanded use of RNAV within the NAS by reducing the reliance on ground-based NDBs for navigation guidance.

Area navigation routes are published in paragraph 6011 of FAA Order 7400.9W, dated August 8, 2012 and effective September 15, 2012, which is incorporated by reference in 14 CFR 71.1. The area navigation routes listed in this document will be published subsequently in the Order.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (49 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the route structure as required to preserve the safe and efficient flow of air traffic.

Environmental Review

The FAA has reviewed the above referenced action and determined that it is categorically excluded from further environmental documentation according to FAA Order 1050.1E, Environmental Impacts: Policies and Procedures, in accordance with paragraphs 311a. Additionally, the implementation of this action will not result in any extraordinary circumstances in accordance with FAA Order 1050.1E paragraph 304.

### Appendix C to Part 4022—Lump Sum Interest Rates for Private-Sector Payments

| * * * * * |

---

PBGC uses the interest assumptions in Appendix B to Part 4022 to determine whether a benefit is payable as a lump sum and to determine the amount to pay. Appendix C to Part 4022 contains interest assumptions for private-sector pension practitioners to refer to if they wish to use lump-sum interest rates determined using PBGC's historical methodology. Currently, the rates in Appendices B and C of the benefit payment regulation are the same. The interest assumptions are intended to reflect current conditions in the financial and annuity markets. Assumptions under the benefit payments regulation are updated monthly. This final rule updates the benefit payments interest assumptions for May 2013.1

The May 2013 interest assumptions under the benefit payments regulation will be 1.00 percent for the period during which a benefit is in pay status and 4.00 percent during any years preceding the benefit’s placement in pay status. In comparison with the interest assumptions in effect for April 2013, these interest assumptions are unchanged.

PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest assumptions promptly so that the assumptions can reflect current market conditions as accurately as possible.

Because of the need to provide immediate guidance for the payment of benefits under plans with valuation dates during May 2013, PBGC finds that good cause exists for making the assumptions set forth in this amendment effective less than 30 days after publication.

PBGC has determined that this action is not a “significant regulatory action” under the criteria set forth in Executive Order 12866.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

### List of Subjects in 29 CFR Part 4022

Employee benefit plans, Pension insurance, Pensions, Reporting and recordkeeping requirements.

In consideration of the foregoing, 29 CFR part 4022 is amended as follows:

#### PART 4022—BENEFITS PAYABLE IN TERMINATED SINGLE-EMPLOYER PLANS

1. The authority citation for part 4022 continues to read as follows:

   Authority: 29 U.S.C. 1302, 1322, 1322b, 1341(c)(3)(D), and 1344.

2. In appendix B to part 4022, Rate Set 235, as set forth below, is added to the table.

---

1 Appendix B to PBGC’s regulation on Allocation of Assets in Single-Employer Plans (29 CFR part 4044) prescribes interest assumptions for valuing benefits under terminating covered single-employer plans for purposes of allocation of assets under ERISA section 4044. Those assumptions are updated quarterly.
