Proposed Amendment of Habitat Conservation Plan and Associated Documents; Green Diamond Resource Company; Mason, Grays Harbor, Lewis, Pacific, and Thurston Counties, WA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the Fish and Wildlife Service (Service), have received an application, under the Endangered Species Act of 1973 (Act), as amended, from Green Diamond Resource Company (GDRCo) for a proposed low-effect amendment to their Habitat Conservation Plan (HCP) and Implementation Agreement (IA). If approved, the GDRCo incidental take permit (ITP), as well as the HCP and IA, would be amended to increase the amount of lands covered under the ITP and HCP; some of the HCP management prescriptions would change, including those associated with marbled murrelet (*Brachyramphus marmoratus*) habitat protection; and the IA would be amended to include a new clause and a new marbled murrelet habitat map. The amendment would change the management of GDRCo's added lands from prescriptions currently required under the standard Washington State Forest Practices Rules (FP Rules) and Forest Practices HCP (FP HCP) to those of the GDRCo HCP. We invite public comment on the proposed amendment

of the ITP, HCP, IA, and associated documents.

DATES: To ensure consideration, please send your written comments by May 15, 2013.

ADDRESSES: You may download a copy of the permit application, HCP, and associated documents on the Internet at <http://www.fws.gov/wafwo/>. SUPPLEMENTARY INFORMATION:

Background

Section 9 of the Act (16 U.S.C. 1531 et seq.) and our implementing Federal regulations in the Code of Federal Regulations (CFR) at 50 CFR 17 prohibit the "take" of fish or wildlife species listed as endangered or threatened. Take of listed fish or wildlife is defined under the Act as "to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct" (16 U.S.C. 1532). However, under section 10 of the Act, for limited circumstances, we issue permits to authorize incidental take of threatened or endangered species—i.e., take that is incidental to, and not the purpose of, the carrying out of otherwise lawful activities. A permit to take bald eagles can also be issued under the Act when associated with a conservation

plan such as an HCP, as long as the Bald and Golden Eagle Protection Act (16 U.S.C. 668-668c) standards are met.

Regulations governing incidental take permits for threatened and endangered species are at 50 CFR 17.32 and 17.22, respectively. Regulations governing take of bald eagles are at 50 CFR 22. In addition to meeting other criteria, an incidental take permit must not jeopardize the continued existence of federally listed threatened or endangered species, and authorized take of bald eagles must be consistent with the goal of maintaining stable or increasing breeding populations of this species.

Introduction

The GDRCo has requested an amendment to the HCP, IA, and ITP originally issued on October 13, 2000, with a term of 50 years. The species covered under the existing and amended ITP would remain the same; however, for some species, listing status has changed since the permit was issued. Covered species under the amended HCP include the bull trout (*Salvelinus confluentus*), which was listed as threatened on June 10, 1998 (63 FR 31693); the marbled murrelet (*Brachyramphus marmoratus*), which was listed as threatened on October 1, 1992 (57 FR 45328); and the bald eagle (*Haliaeetus leucocephalus*), which was listed as threatened in Washington on February 14, 1978 (43 FR 6230), and delisted throughout the United States on July 9, 2007 (72 FR 37346). Also covered are 5 anadromous fish species under the jurisdiction of the National Marine Fisheries Service, 2 of which are listed, and 43 additional non-listed species associated with western forests, streams, and wetlands.

The northern spotted owl (*Strix occidentalis caurina*), which was listed as threatened on June 26, 1990 (55 FR 26114), is not covered in the existing or proposed amendment to the HCP. Management of northern spotted owls and their habitat on GDRCo lands would continue to be guided by applicable FP Rules, as well as by the take prohibitions under the Act.

Applicant's Proposal

The proposed amendment would add to the permit approximately 53,000 acres and 854 stream miles of covered lands, for a total of approximately 319,000 acres and 2,575 stream miles on GDRCo lands, to be managed in accordance with their HCP. Any additional lands that may be acquired by GDRCo within the Chehalis and Willapa Basins during the term of the permit may also be added to the HCP,
