SUPPLEMENTARY INFORMATION:

Title of Collection: International Cover Page Addendum.

OMB Control No.: 3145-0205.

Expiration Date of Approval: July 31, 2013.

Abstract: The Office of International Science and Engineering within the Office of the NSF Director will use the International Cover Page Addendum. Principal Investigators submitting proposals to this Office will be asked to complete an electronic version of the International Cover Page Addendum. The Addendum requests foreign counterpart investigator/host information and participant demographics not requested elsewhere in NSF proposal documents.

The information gathered with the International Cover Page Addendum serves four purposes. No current component of a standard NSF proposal requests this information. (The international cooperative activities box on the standard NSF Cover Page applies only to one specific type of activity, not the wide range of activities supported by OISE.) NSF proposal assignment applications are program element-based and therefore can not be used to determine assignment by country. The second use of the information is program management. OISE is committed to investing in activities in all regions of the world. With data from this form, the Office can determine submissions by geographic region. Thirdly, funding decisions can not be made without details for the
