Agency Information Collection Activities; Requests for Comments; Clearance of Renewed Approval of Information Collection: Automatic Dependent Surveillance—Broadcast (ADS-B) Out Performance Requirements To Support Air Traffic Control (ATC) Service

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of

Management and Budget (OMB) approval to renew an information collection. The final rule titled "Automatic Dependent Surveillance—Broadcast (ADS-B) Equipage Mandate To Support Air Traffic Control Service" (75 FR 30160) requires performance requirements for certain avionics equipment on aircraft operating in specified classes of airspace within the United States National Airspace System. The rule facilitates the use of ADS-B for aircraft surveillance by FAA air traffic controllers to accommodate the expected increase in demand for air transportation.

DATES: Written comments should be submitted by June 18, 2013.

FOR FURTHER INFORMATION CONTACT: Kathy DePaepe at (405) 954-9362, or by email at: Kathy.A.DePaepe@faa.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2120-0728.

Title: Automatic Dependent

Surveillance—Broadcast (ADS-B) Out Performance Requirements to Support Air Traffic Control (ATC) Service.

Form Numbers: There are no FAA forms associated with this collection.

Type of Review: Renewal of an information collection.

Background: 14 CFR part 91 includes requirements for certain avionics equipment on aircraft operating in specified airspace within the United States National Airspace System (NAS). This collection supports the information needs of the FAA by requiring avionics equipment that continuously transmits aircraft information to be received by the FAA, via automation, for use in providing air traffic surveillance services. This information is collected electronically without input from the human operator. Old information is overwritten on a continuous basis. A 1-hour burden is submitted as a placeholder to allow entry in OMB's burden inventory.

Respondents: Approximately 64,339 aircraft operators will install ADS-B Out equipment.

Frequency: Information is collected automatically via the ADS-B Out equipment.

Estimated Average Burden per Response: 1 hour (placeholder for automated collection).

Estimated Total Annual Burden: 1 hour (placeholder for automated collection).

ADDRESSES: Send comments to the FAA at the following address: Ms. Kathy DePaepe, Room 126B, Federal Aviation Administration, AES-200, 6500 S. MacArthur Blvd., Oklahoma City, OK 73169.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Issued in Washington, DC on April 15, 2013.

Albert R. Spence,

FAA Assistant Information Collection Clearance Officer, IT Enterprises Business Services Division, AES-200.
