

maggot in turnip and rutabaga production. The applicant indicates that fipronil has been shown to provide excellent crop safety, and overall provides better control than the registered alternative.

The Applicant proposes to make no more than one application at 4.16 fluid oz. of product per acre, to a maximum of 600 acres of rutabagas and turnips, for use of up to a potential maximum of 19.5 gallons of product. Applications would potentially be made from April 1 through September 30, 2013, in the Oregon counties of Clackamas, Marion, Multnomah, and Umatilla.

This notice does not constitute a decision by EPA on the application itself. The regulations governing FIFRA section 18 require publication of a notice of receipt of an application for a specific exemption proposing a use which is supported by the IR-4 program and has been requested in 5 or more previous years, and a petition for tolerance has not yet been submitted to the Agency. The notice provides an opportunity for public comment on the application. The Agency will review and consider all comments received during the comment period in determining whether to issue the specific exemption requested by the Oregon Department of Agriculture.
