

United States Global Change Research Program will coordinate collection and compilation of U.S. expert comments to develop a consolidated U.S. Government submission, which will be provided to the IPCC by 2 June 2013. Instructions for review and submission of comments are available at: review.globalchange.gov.

Experts may choose to provide comments directly through the IPCC's Expert Review process, which occurs in parallel with the U.S. Government Review. More information on the IPCC's comment process can be found at <http://www.ipcc.ch/activities/activities.shtml> and http://www.ipcc-nggip.iges.or.jp/forms/wetlandsreview_registration.html. To avoid duplication, comments submitted for consideration as part of the U.S. Government Review should not also be sent to the IPCC Secretariat through the Expert Review process (and vice versa). Comments to the U.S. government review should be submitted using the web-based system at: review.globalchange.gov.

This certification will be published in the **Federal Register**.

SUPPLEMENTARY INFORMATION:

Background

The FAA has established Docket No. FAA-2013-0316 for the purpose of enabling the public to comment on several draft documents developed by the Airman Testing Standards and Training Working Group. The following documents have been placed in that docket for public review and comment:

- (1) Background Information; Industry-Led Changes to FAA Airman Testing Standards and Training
- (2) Draft PRIVATE PILOT—AIRPLANE Airman Certification Standards;
- (3) Draft Change Tracking Matrix referenced to FAA-S-8081-14B, Private Pilot Practical Test Standards for Airplane (Single Engine Land and Single-Engine Sea Areas of Operation); Section 1: Private Pilot
- (4) Draft INSTRUMENT RATING—Airman Certification Standards; and
- (5) Draft Change Tracking Matrix referenced to FAA-S-8081-4E, Instrument Rating Practical Test Standards for Airplane, Helicopter, and Powered Lift

On August 30, 2012, the ARAC Executive Committee accepted the

FAA's assignment of a new task arising from recommendations of the Airman Testing Standards and Training Aviation Rulemaking Committee (ARC). The ARC recommended ways to ensure that the FAA's airman testing and training materials better support reduction of fatal general aviation accidents. The new task instructed the ARAC to integrate aeronautical knowledge and flight proficiency requirements for the private pilot and flight instructor certificates and the instrument rating into a single ACS document for each type of certificate and rating; to develop a detailed proposal to realign FAA training handbooks with the ACS documents; and to propose knowledge test item bank questions consistent with the integrated ACS documents and the principles set forth in the ARC's recommendations.

The FAA announced the ARAC's acceptance of this task through a **Federal Register** Notice published on September 12, 2012 [77 FR 56251]. This Notice described the task elements and solicited participants for the ATSTWG, which subsequently formed and began its work in November 2012.

Consistent with the initial part of this tasking, the ATSTWG has developed draft ACS documents for the private pilot certificate and the instrument rating. These documents align the aeronautical knowledge testing standards with the flight proficiency standards set out in the existing Practical Test Standards (PTS). In addition to supporting the FAA's effort to improve the relevance, reliability, validity, and effectiveness of aeronautical testing and training materials, the draft ACS documents support the FAA's goal of reducing fatal general aviation accidents by incorporating task-specific risk management considerations into each Area of Operation.

The ATSTWG continues the necessary work to develop the authorized instructor ACS document and complete its remaining assignments. These include developing a detailed proposal to realign and, as appropriate, streamline and consolidate existing FAA guidance material (e.g., handbooks) with each integrated ACS document; and to propose methodologies to ensure that knowledge test item bank questions are consistent with both the ACS documents and the test question development principles set forth in the ARC's recommendations.

The ACS documents are designed as the foundation for transitioning to a more integrated and systematic approach to airman certification testing
