SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On October 17, 2012 (77 FR 63813), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments and any additional comments on this ICR should be submitted to both EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under docket ID number EPA–HQ–OECA–2012–0695, which is available for either public viewing online at http://www.regulations.gov, or in person viewing at the Enforcement and Compliance Docket in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Avenue NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566–1744, and the telephone number for the Enforcement and Compliance Docket is (202) 566–1752.

Use EPA’s electronic docket and comment system at http://www.regulations.gov to either submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select “docket search,” then key in the docket ID number identified above. Please note that EPA’s policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at http://www.regulations.gov as EPA receives them and without change, unless the comment contains copyrighted material, Confidentiality of Business Information (CBI), or other information whose public disclosure is restricted by statute. Title: NESHAP for Site Remediation (Renewal).

ICR Numbers: EPA ICR Number 2062.05, OMB Control Number 2060–0534.

ICR Status: This ICR is scheduled to expire on June 30, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart GGGCG.

Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 245 hours per response. “Burden” means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operator of site remediation facilities.

Estimated Number of Respondents: 286.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 140,338.

Estimated Total Annual Cost: $14,302,488, which includes $13,720,488 in labor costs, no capital/ startup costs, and $582,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment increase in labor hours and costs from the most recent ICR. This is not due to any program changes. The increase in labor hours is due to a change in the burden calculation methodology. The previous ICR did not account for managerial and clerical hours for some burden activities. This ICR assumes that managerial and clerical hours are 5 percent and 10 percent of technical hours for each burden activity, respectively. The increase in costs is due to an increase in labor rates, as well as the methodology change described above.
