

requests under 10 CFR 50.54(f). The information collected would be used to support the NRC staff's evaluation of whether further regulatory action was needed in the areas of seismic and flooding design, and emergency preparedness.

In addition to Commission direction, the Consolidated Appropriations Act, Public Law 112-074, was signed into law on December 23, 2011. Section 402 of the law directs the NRC to require licensees to reevaluate their design basis for external hazards.

In response to the aforementioned Commission and Congressional direction, the NRC issued a request for information to all power reactor licensees and holders of construction permits under 10 CFR Part 50 on March 12, 2012. The March 12, 2012, letter includes a request that licensees reevaluate flooding hazards at nuclear power plant sites using updated flooding hazard information and present day regulatory guidance and methodologies. The letter also requests the comparison of the reevaluated hazard to the current design basis at the site for each potential flood mechanism. If the reevaluated flood hazard at a site is not bounded by the current design basis, licensees are requested to perform an Integrated Assessment. The Integrated Assessment will evaluate the total plant response to the flood hazard, considering multiple and diverse capabilities such as physical barriers, temporary protective measures, and operational procedures. The NRC staff will review the licensees' responses to this request for information and determine whether regulatory actions are necessary to provide additional protection against flooding.

It should be noted that the NRC requires nuclear power plants to protect against very unlikely flooding hazards. This guidance focuses on developing potential dam failure scenarios that nuclear power plants have to protect against. This guidance should in no way be construed as appropriate for designing, regulating, operating, or maintaining a dam. Such guidance has been developed by the appropriate responsible agency that designs, regulates, operates, or maintains the dam(s) of interest. Although this ISG attempts to be consistent with best practices and guidance developed by other federal and state agencies, there may be differences. In some cases, the differences between this ISG and the guidance developed by other agencies may be due to differences in regulatory responsibilities.

### Proposed Action

By this action, the NRC is requesting public comments on draft JLD-ISG-2013-01. This draft JLD-ISG provides guidance acceptable to the NRC staff for reevaluating flooding hazards due to dam failure for the purpose of responding to enclosure 2 of the information request. The NRC staff will make a final determination regarding issuance of the JLD-ISG after it considers any public comments received in response to this request.

Dated at Rockville, Maryland, this 17th day of April 2013.

For the Nuclear Regulatory Commission.

**SECURITIES AND EXCHANGE COMMISSION**

**Submission for OMB Review; Comment Request**

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

*Extension:*

Rule 17a–5, SEC File No. 270–155, OMB Control No. 3235–0123.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (“Commission”) has submitted to the Office of Management and Budget (“OMB”) a request for approval of extension of the previously approved collection of information provided for in Rule 17a-5 (17 CFR 240.17a-5), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 17a-5 is the basic financial reporting rule for brokers and dealers.<sup>1</sup> The Rule requires the filing of Form X–17A–5, the Financial and Operational Combined Uniform Single Report (“FOCUS Report”), which was the result of years of study and comments by representatives of the securities industry through advisory committees and through the normal rule proposal methods. The FOCUS Report was designed to eliminate the overlapping regulatory reports required by various self-regulatory organizations and the Commission and to reduce reporting burdens as much as possible. The Rule also requires the filing of an annual audited report of financial statements.

The FOCUS Report consists of: (1) Part I, which is a monthly report that must be filed by brokers or dealers that clear transactions or carry customer securities; (2) one of three alternative quarterly reports: Part II, which must be filed by brokers or dealers that clear transactions or carry customer securities; Part IIA, which must be filed by brokers or dealers that do not clear transactions or carry customer securities; and Part IIB, which must be filed by specialized broker-dealers registered with the Commission as OTC derivatives dealers;<sup>2</sup> (3) supplemental schedules, which must be filed annually; and (4) a facing page, which must be filed with the annual audited report of financial statements. Under the Rule, a broker or dealer that computes certain of its capital charges in accordance with Appendix E to Exchange Act Rule 15c3–1 must file additional monthly, quarterly, and annual reports with the Commission.

The variation in the size and complexity of brokers and dealers subject to Rule 17a-5 and the differences in the FOCUS Report forms that must be filed under the Rule make it difficult to calculate the cost of compliance. However, we estimate that, on average, each report will require approximately 12 hours. At year-end 2011, the Commission estimates that there were approximately 4,802 brokers or dealers, and that of those firms there were approximately 513 brokers or dealers that clear transactions or carry customer securities. The Commission therefore estimates that approximately 513 firms filed monthly reports, approximately 4,134 firms filed quarterly reports, and

<sup>1</sup> Rule 17a-5(c) requires a broker or dealer to furnish certain of its financial information to customers and is subject to a separate PRA filing (OMB Control Number 3235–0199).

<sup>2</sup> Part IIB of Form X–17A–5 must be filed by OTC derivatives dealers under Exchange Act Rule 17a-12 and is subject to a separate PRA filing (OMB Control Number 3235–0498).
