

Exchange, in particular by facilitating the bringing of buyers and sellers together.

The Exchange also believes that the proposed change is equitable and not unfairly discriminatory because extending the proposed visibility to other off-Floor participants presents obvious dangers: NYSE Rules 98 and 104(b) are not applicable to other proprietary traders, and if disaggregated information were provided electronically to all participants, there would be no mechanism or informational barrier ensuring that the disaggregated information could only be used for the benefit of investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed rule change will facilitate the execution of block trades, and as a result, will reduce the market impact and associated transactions costs for members wishing to take advantage of the rule proposal. The reduction of transaction costs, along with the proposal's other purpose of expediting error resolution, will improve the efficiency of the market and remove barriers to order execution, thus increasing the level of participation and competition in the marketplace.

The Exchange operates in a highly competitive market in which market participants can easily and readily direct order flow to competing venues. The Exchange's integration of human judgment into a point of sale occurs within that competitive landscape filled with customer choice among both exchange and off-exchange venues. The modest increase in visibility offered by the proposed rules, especially in light of increasing dispersal of liquidity, in no way upsets that competitive balance.
