ENVIRONMENTAL PROTECTION AGENCY

[FRL-9808-5; Docket ID No. EPA-HQ-ORD-2013-0232]

Draft Plan for Development of the Integrated Science Assessment for Nitrogen Oxides—Health Criteria

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public comment period.

SUMMARY: The U.S. EPA is announcing the availability of the “Draft Plan for Development of the Integrated Science Assessment for Nitrogen Oxides—Health Criteria.” The draft document was prepared by the National Center for Environmental Assessment (NCEA) within EPA’s Office of Research and Development as part of the review of the primary (health-based) national ambient air quality standards (NAAQS) for nitrogen dioxide (NO₂). The purpose of this draft document is to communicate the plan for the development of the Integrated Science Assessment (ISA) for the health effects of nitrogen oxides (NO_x), which will provide a comprehensive assessment of the current scientific literature pertaining to known and anticipated effects on public health associated with the NO_x in the ambient air.

EPA is releasing this draft document to seek consultation by the Clean Air Scientific Advisory Committee (CASAC) and the public (meeting date and time to be specified in a separate **Federal Register** notice). The draft document does not represent and should not be construed to represent any final EPA policy, viewpoint, or determination. EPA will consider any public comments submitted in response to this notice when revising the draft plan for development of the NO_x ISA.

DATES: The public comment period begins, May 3, 2013, and ends May 31, 2013. Comments must be received on or before May 31, 2013.

ADDRESSES: The “Draft Plan for Development of the Integrated Science

Assessment for Nitrogen Oxides—Health Criteria” will be available primarily via the Internet on the NCEA home page under the Recent Additions and Publications menus at <http://www.epa.gov/ncea> or in the public docket at <http://www.regulations.gov> (Docket ID: EPA-HQ-ORD-2013-0232). A limited number of CD-ROM or paper copies will be available. Contact Ms. Marieka Boyd by phone (919-541-0031), fax (919-541-5078), or email (boyd.marieka@epa.gov) to request either of these, and please provide your name, your mailing address, and the document title, “Draft Plan for Development of the Integrated Science Assessment for Nitrogen Oxides—Health Criteria” to facilitate processing of your request.

FOR FURTHER INFORMATION CONTACT: For technical information, contact Dr. Molini Patel, NCEA; telephone: 919-541-1492; facsimile: 919-541-1818; or email: patel.molini@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Information About the Document

Section 108(a) of the Clean Air Act directs the Administrator to identify certain pollutants, which among other things, “cause or contribute to air pollution, which may reasonably be anticipated to endanger public health or welfare” and to issue air quality criteria for them. These air quality criteria are to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare, which may be expected from the presence of [the] pollutant in the ambient air. . . .” Under section 109 of the Act, EPA is then to establish NAAQS for each pollutant for which EPA has issued criteria. Section 109(d) of the Act subsequently requires periodic review and, if appropriate, revision of existing air quality criteria to reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. EPA is also to revise the NAAQS, if appropriate, based on the revised air quality criteria.

NO₂ is one of six criteria pollutants for which EPA has established NAAQS. Periodically, EPA reviews the scientific basis for these standards by preparing an ISA (formerly called an Air Quality Criteria Document). The ISA, in conjunction with additional technical and policy assessments, provide the scientific basis for EPA decisions on the adequacy of the current NAAQS and the appropriateness of possible alternative standards. The CASAC, an independent science advisory committee whose review and advisory functions are

mandated by Section 109(d)(2) of the Clean Air Act, is charged (among other things) with independent scientific review of EPA’s air quality criteria.

On February 10, 2012 (77 FR 7149), EPA formally initiated its current review of the air quality criteria for the health effects of NO_x and the primary (health-based) NO₂ NAAQS, requesting the submission of recent scientific information on specified topics. EPA held a workshop February 29 to March 1, 2013, to discuss with invited scientific experts, key science and policy issues relevant to the review of the health effects of NO_x (77 FR 7149). NCEA has prepared a draft plan for development of the ISA for the health effects of NO_x, which communicates the scope, organization, methodology, and key policy-relevant issues for the ISA. EPA is planning to release the first external review draft of the health effects ISA for NO_x for review by CASAC and the public later on in 2013.

Development of the ISA is one phase of the NAAQS review, and a draft Integrated Review Plan (IRP) is being developed that will characterize all of the phases of the review of the primary NAAQS for NO₂, including the schedule for the entire review, the process for conducting the various phases of the review, and the key policy-relevant science issues that will guide the review. The draft IRP will be released for review by CASAC and the public later on in 2013 and after consideration of CASAC and public comments, a final IRP will be issued in early 2014. The IRP will incorporate a revised plan for ISA development after consideration of CASAC and public comments.
