Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Discussion

This supplement includes the NRC staff evaluation of revised information provided by NextEra pertaining to the severe accident mitigation alternatives (SAMA) analysis for Seabrook. In addition, this supplement updates the Uranium Fuel Cycle section in light of the June 8, 2012, U.S. Court of Appeals for the District of Columbia Circuit (*New York v. NRC*, 681 F.3d 471 (D.C. Cir. 2012)) decision to vacate the NRC's Waste Confidence Decision Rule (75 FR 81032, 75 FR 81037) and provides information on its analysis of new NEPA issues and associated environmental impact findings for license renewal. This supplement does not change the recommendation in Section 9.4 of the draft supplement issued in August 2011. In the August 2011 draft Supplement 46, the NRC's preliminary recommendation was that the adverse environmental impacts of license renewal for Seabrook Station, Unit 1, were not great enough to deny the option of license renewal for energy-planning decision makers.

Dated at Rockville, Maryland, this 26th day of April 2013.

For the Nuclear Regulatory Commission.

David J. Wrona,

Chief, Projects Branch 2, Division of License Renewal, Office of Nuclear Reactor Regulation.
