Title: NSPS/NESHAP for Wool Fiberglass Insulation Manufacturing Plants (Renewal).

ICR Numbers: EPA ICR Number 1160.12, OMB Control Number 2060-0114.

ICR Status: This ICR is scheduled to expire on June 30, 2013. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NSPS/NESHAP at 40 CFR part 60, subpart A and part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart PPP and part 63, subpart NNN.

Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required annually at a minimum.

Respondents/Affected Entities: Owners or operators of wool fiberglass manufacturing facilities.

Estimated Number of Respondents: 61
Frequency of Response: Occasionally and semiannually

Estimated Total Annual Hour Burden: 18,559

Estimated Total Annual Cost: \$2,285,560, which includes \$1,797,060 in labor costs, no capital/startup costs, and \$488,500 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an adjustment increase in the total estimated labor costs. The change in cost estimates occurred because the labor rates have increased since the last ICR. This ICR used the most recent labor rates in calculating all burden costs.

Additionally, the annual public reporting and recordkeeping burden for this collection of information has increased from 103 hours per response to 145 hours per response (41 hours per response for 40 CFR part 60, subpart PPP, and 249 hours per response for 40 CFR part 63, subpart NNN). This is due

to a correction in the total number of annual responses. The total number of annual responses decreased from 180 to 128. To calculate the number of responses, the previous ICR assumed that all 29 sources subject to subpart NNN were required to submit Startup, Shutdown, and Malfunction (SSM) reports semiannually. This method was inconsistent with the burden calculations for Tables 1a and 1b, which assumed only 10% of all sources submit such reports. This ICR corrected the number of sources for submitting SSM reports, which results in a decrease in the number of responses for subpart NNN.

Abstract: The Clean Air Act (CAA) section 112(r)(7) required EPA to promulgate reasonable regulations and appropriate guidance to provide for the prevention and detection of accidental releases and for responses to such releases. The regulations include requirements for submittal of a risk management plan (RMP) to EPA. The RMP includes information on offsite consequence analyses (OCA) as well as other elements of the risk management program.

The Chemical Safety Information, Site Security, and Fuels Regulatory Relief Act (CSISSFRA) required the President to promulgate regulations on the distribution of OCA information (CAA section 112(r)(7)(H)(ii)). The state and local agencies who decide to obtain OCA information must send a written request on their official letterhead to EPA certifying that they are covered persons under Public Law 106–40, and

that they will use the information for official use only. EPA will then provide OCA data to those agencies as requested. The rule authorizes and encourages state and local agencies to set up reading rooms. The local reading rooms provide read-only access to OCA information for all the sources in the Local Emergency Planning Committee's (LEPC) jurisdiction and for any source where the vulnerable zone extends into the LEPC's jurisdiction.

Form Numbers: None.

Respondents/affected entities: States, local agencies and members of the public.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 865.

Frequency of response: Annual, On Occasion.

Total estimated burden: 1,515 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$48,919 per year, includes \$65 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 7,815 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. There has been a decrease in the number of people visiting the reading rooms to obtain OCA data, therefore decreasing the burden on respondents to provide the data.
