SUPPLEMENTARY INFORMATION: The American Time Use Survey (ATUS) Well-being supplement includes questions about how people experience their time. For example, the supplement asks how happy and stressed the respondent was the day before and the degree to which they felt pain. The supplement also includes questions on general health and life satisfaction. Information collected in the Well-being module is published as a public use data set to facilitate research on numerous topics, such as how people experience time spent in different activities, times of social interaction, and pain; the relationship between health and time use; and the relationship between life satisfaction and point-in-time affective experiences. Sponsored by the National Institute of Aging (NIA) of the National Institutes of Health, the module is asked of all respondents immediately upon their completion of the ATUS. The Well-being module supports the BLS mission, by providing new insight into the ATUS data on time use and information specifically about workers' affective experiences. The data collection supports the NIA mission, by providing information about the health and well-being of older Americans.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. SUPPLEMENTARY INFORMATION: On August 2, 2012 (77 FR 46128), the NRC published for public comment the proposed Revision 0 to Section 19.5, "Adequacy of design features and functional capabilities identified and described for withstanding aircraft impacts," (ADAMS Accession No. ML12138A468). Three comment submissions were received on the proposed revision (ADAMS Accession Nos.: ML12249A406, ML12237A139 and ML12258A071). The staff made changes to the proposed revision after consideration of the comments. A summary of the comments and the staff's disposition of the comments are available in a separate document, *Response to Public Comments On Draft Standard Review Plan (SRP) 19.5: Adequacy Of Design Features And Functional Capabilities Identified And Described For Withstanding Aircraft Impacts* (ADAMS Accession No.

ML12306A341). The staff has also prepared a redline version of the SRP section showing the difference between the proposed and final SRP section (ADAMS Accession No. ML12307A168).

The NRC staff will incorporate the positions reflected in Revision 0 of SRP Section 19.5 into the next revision of Regulatory Guide 1.206, "Combined License Applications for Nuclear Power Plants" (ADAMS Accession No. ML070720184).

Backfitting and Issue Finality

Issuance of this final SRP section does not constitute backfitting as defined in § 50.109 of Title 10 of the *Code of Federal Regulations* (10 CFR) (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in part 52 of 10 CFR. The staff's position is based upon the following considerations:

- The SRP positions do not constitute backfitting, inasmuch as the SRP is internal guidance directed at the NRC staff with respect to their regulatory responsibilities.

- The SRP positions represent the first internal NRC guidance on a regulation for which the backfitting and issue finality considerations have already been addressed.

- The NRC staff has no intention to impose the SRP positions on current licensees and regulatory approvals either now or in the future.

- Backfitting and issue finality do not—with limited exceptions not applicable here—protect current or future applicants.

Each of these considerations is discussed in more detail below.

1. *The SRP positions do not constitute backfitting, inasmuch as the SRP is internal guidance directed at the NRC staff with respect to their regulatory responsibilities.*

The SRP provides guidance to the staff on how to review an application for NRC regulatory approval in the form of licensing. Changes in internal staff guidance are not matters for which either nuclear power plant applicants or licensees are protected under either the Backfit Rule or the issue finality provisions of part 52.

2. *The SRP positions represent the first internal NRC guidance on a regulation for which the backfitting and issue finality considerations have already been addressed.*

This SRP addresses compliance with the Aircraft Impact Assessment (AIA) Rule, 10 CFR 50.150. The backfitting and issue finality issues for this rulemaking were addressed as part of the original AIA rulemaking (74 FR 28112, 28143-45; June 12, 2009).
