Funds not obligated will be allocated pro rata to the remaining States which

applied during the specified grant application period to be solely expended on projects previously approved in their State plan. AMS will notify the States as to the procedures for applying for the reallocated funds.

AMS requires applicants to submit SCBGP-FB applications electronically through the central Federal grants Web site, www.grants.gov instead of mailing hard copy documents. Original signatures are not needed on the SF-424 and SF-424B when applying through www.grants.gov and applicants are not required to submit any paper documents to AMS. Applicants are strongly urged to familiarize themselves with the Federal grants Web site and begin the application process well before the application deadline. For information on how to apply electronically, please consult http://www.grants.gov/applicants/get_registered.jsp. AMS will send an email confirmation when applications are received by the AMS office.

SCBGP-FB is listed in the "Catalog of Federal Domestic Assistance" under number 10.170 and subject agencies must adhere to Title VI of the Civil Rights Act of 1964, which bars discrimination in all federally assisted programs.

SUPPLEMENTARY INFORMATION:

Title: Commercial Transportation of Equines for Slaughter.

OMB Number: 0579-0160.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Federal Agriculture Improvement and Reform Act of 1996 ("the Farm Bill"), Congress gave responsibility to the Secretary of Agriculture to regulate the commercial transportation within the United States of equines for slaughter. Sections 901-905 of the Farm Bill (7 U.S.C. 1901 note) authorized the Secretary to issue guidelines for the regulation of commercial transportation of equines for slaughter by persons regularly engaged in that activity within the United States. As a result of that authority, the U.S. Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS) established regulations in 9 CFR part 88, "Commercial Transportation of Equines for Slaughter."

The minimum standards for transportation cover, among other things, the food, water, and rest provided to such equines. The regulations also require the owner/shipper of the equines to take certain actions in loading and transporting the equines and to certify that the commercial transportation meets certain requirements. In addition, the regulations prohibit the commercial transportation to slaughtering facilities of equines considered to be unfit for travel, the use of electric prods on such animals in commercial transportation to slaughter, and the use of double-deck trailers for commercial transportation of equines to slaughtering facilities.

These regulations require several information collection activities, including a USDA-APHIS Owner/Shipper Certificate Fitness to Travel to a Slaughter Facility Form/Continuation Sheet (Veterinary Services-VS Forms 10-13/10-13A), the collection of

business information from any individual or other entity found to be transporting horses to a slaughtering facility, and recordkeeping.

Since the last approval of these collection activities, APHIS amended its regulations to require that owners/shippers complete VS Forms 10-13/10-13A for each movement of horses between assembly points. APHIS believes that, on average, a horse bound for slaughter will make at least one stop at an assembly point within the United States before final transport to slaughter. As a consequence, APHIS estimates that this will result in an increase in the number of responses submitted annually from 6,700 to 13,100, and increase the number of total burden hours from 2,603 to 9,803. However, this increase in burden hours also reflects reevaluation by APHIS of the time necessary for respondents to complete the forms and the time for respondents to inspect the horses prior to completion of the form, which was not previously accounted for by APHIS.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.7483 hours per response.

Respondents: Owners and shippers of slaughter horses, owners/operators of slaughtering facilities, and drivers of the transport vehicles.

Estimated annual number of respondents: 300.

Estimated annual number of responses per respondent: 43.666.
