

regulations at 40 CFR Parts 2 and 1042.915, and class determinations issued by EPA's Office of General Counsel. Non-confidential business information may be disclosed as requested under FOIA. That information may be used by trade associations, environmental groups, and the public. Most of the information is collected in electronic format and stored in CD's databases.

Form Numbers: 5900–90 (Annual Production Report template); PLT reporting template. EPA is in the process of obtaining a form number for the PLT reporting template.

Respondents/affected entities: Respondents are manufacturers and owners or operators of marine compression-ignition engines above 30 liters per cylinder and the vessels in which those engines are installed. Respondents are within the following North American Industry Classification System (NAICS) codes: 333618 (Other Engine Equipment Manufacturing), 336611 (Manufacturers of Marine Vessels); 811310 (Engine Repair and Maintenance); 483 (Water transportation, freight and passenger).

Respondent's obligation to respond: Required to obtain or retain a benefit. Manufacturers must respond to this collection if they wish to sell and/or operate their Category 3 engines in the U.S., as prescribed by Section 206(a) of the CAA (42 U.S.C. 7521) and 40 CFR Part 1042. Certification reporting is mandatory (Section 206(a) of CAA (42 U.S.C. 7521) and 40 CFR Part 1042, Subpart C). PLT reporting is mandatory (Section 206(b)(1) of CAA and 40 CFR Part 1042, Subpart D).

Estimated number of respondents: 200 (total, including engine manufacturers, owners and operators).

Frequency of response: Quarterly, Annually, On Occasion, depending on the program.

Total estimated burden: 3,012 hours per year. Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: Estimated total annual costs: \$200,000 (per year), includes an estimated \$65,155 annualized capital or maintenance and operational costs.

Changes in Estimates: To date, there are no changes in the total estimated respondent burden compared with the ICR currently approved by OMB. However, EPA is evaluating information that may lead to a change in the estimates. After EPA has evaluated this information, burden estimates may slightly decrease due to the fact that EPA has received fewer applications for certification of Category 3 engine families than previously estimated. Cost

estimates may increase due to inflation and labor rate changes.

ICR#2 Engine Emission Defect Information Reports and Voluntary Emission Recall Reports (Revision to an Existing Package),” Expiring October 31, 2013; EPA ICR No. 0282.15, OMB Control No. 2060–0048; Docket ID Number: EPA–HQ–OAR–2006–0895

Abstract: For this ICR, EPA is seeking a revision to an existing package with a three year extension. Under the provisions of the Clean Air Act (CAA), EPA is required to promulgate regulations to control emissions of air pollutants from motor vehicles and nonroad engines, as defined in the CAA. Per Sections 207(d)(1) and 213 of the CAA, when a substantial number of properly maintained and used engines produced by the same manufacturer do not conform to emission requirements, the manufacturer is required to recall the engines. When emission-related defects are found on a number of engines of the same model year and that defect may cause the engine emissions to exceed the standards, the engine manufacturer is required to submit an Emission Defect Information Report (EDIR). EDIRs allow EPA to target potentially nonconforming classes of engines for future testing, to monitor compliance with applicable regulations and to order a recall, if necessary. Engine manufacturers can also initiate a recall voluntarily by submitting a Voluntary Emission Recall Report (VERR). VERRs and VERR updates allow EPA to determine whether the manufacturer conducting the recall is acting in accordance with the CAA and to monitor the effectiveness of the recall campaign.

The information requested is collected by the Diesel Engine Compliance Center (DECC), Compliance Division (CD), Office of Transportation and Air Quality, Office of Air and Radiation, EPA. Besides DECC and CD, this information could be used by the Office of Enforcement and Compliance Assurance and the Department of Justice for enforcement purposes. Proprietary information is kept confidential in accordance with the Freedom of Information Act (FOIA), EPA regulations at 40 CFR Parts 2, and class determinations issued by EPA's Office of General Counsel. Non-confidential business information may be disclosed as requested under FOIA. That information may be used by trade associations, environmental groups, and the public.

Form Numbers: Emissions Defect Information Report Form; Voluntary Emissions Recall Report Form; and

Quarterly Recall Report Form. EPA is in the process of obtaining form numbers for these three forms.

Respondents/affected entities: Entities potentially affected by this action are manufacturers of on-highway heavy-duty engines, nonroad engines, fuel system components, marine engines, recreational vehicles, locomotives and locomotive engines.

Respondent's obligation to respond: Per sections 207(c)(1) and 213 of the Clean Air Act (CAA), engine manufacturers must submit EDIRs once a certain threshold is met. The threshold varies according to the type of engine and the part under which it is regulated. VERRs are submitted voluntarily.

Estimated number of respondents: 40 (total).

Frequency of response: EDIRs and VERRs are submitted on occasion, whereas VERR updates are submitted quarterly by some respondents.

Total estimated burden: 15,084 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1,187,132 (per year), includes \$9,800 annualized capital or operation & maintenance costs.

Changes in Estimates: To date, there is a decrease of 11,479 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. However, EPA is evaluating information that may lead to a change in this estimate. The expected decrease is due to the fact that EPA has received far fewer EDIRs and VERRs than previously expected.

Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation.
