#### **Lewis County Development Corporation; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications**

On May 2, 2013, the Lewis County Development Corporation (Lewis County Corp), filed an application for a successive preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Croghan Dam Hydroelectric Project (project) to be located at the existing Croghan Dam, on the Beaver River, in Lewis County, New York. The sole purpose of a preliminary permit, if issued, is to grant the permit holder

priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) An existing concrete gravity dam structure consisting of an 11.5-foot-high by 120-foot-long section, and a 9.5-foot-high by 103-foot-long section; (2) an existing impoundment with a normal water surface elevation of 818 feet mean sea level extending 2.7 miles upstream; (3) a new 75-foot-long by 35-foot-wide powerhouse; (4) a new turbine generator unit with a total installed capacity of 500 kilowatts; (5) a new 13.2-kilovolt transmission line interconnecting with the National Grid; and (6) appurtenant facilities. The proposed project would operate in run-of-river mode and generate an estimated average annual generation of 1,387 megawatt-hours.
