SUPPLEMENTARY INFORMATION:

I. Abstract

Representatives of the IHS seek renewal of the approval for information collections conducted under 25 CFR part 900, implementing the Indian Self-Determination and Education Assistance Act (ISDEAA), as amended (25 U.S.C. 450 et seq.), which describes how contracts are awarded to Indian Tribes. The rule at 25 CFR part 900 was developed through negotiated rulemaking with Tribes in 1996 and governs, among other things, what must be included in a Tribe's initial ISDEAA contract proposal to IHS. A response is required to obtain and retain a benefit.

The information requirements for this rule represent significant differences from other agencies in several respects. Under the Act, the Secretary of Health and Human Services is directed to enter into self-determination contracts with Tribes upon request, unless specific declination criteria apply, and, generally, Tribes may renew these contracts annually, whereas other agencies provide grants on a discretionary or competitive basis. Additionally, IHS awards contracts for multiple programs whereas other agencies usually award single grants to Tribes.

The IHS uses the information collected to determine applicant eligibility, evaluate applicant capabilities, protect the service population, safeguard Federal funds and other resources, and permit the Federal agency to administer and evaluate contract programs. Tribal governments or Tribal organizations provide the information by submitting contract proposals, and related information, to the IHS, as required under Public Law 93-638. No third party notification or

public disclosure burden is associated with this collection.

II. Request for Comments

The IHS requests your comments on this collection concerning: (a) the necessity of this information collection for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden (hours and cost) of the collection of information, including the validity of the methodology and assumptions used; (c) ways we could enhance the quality, utility, and clarity of the information to be collected; and (d) ways we could minimize the burden of the collection of the information on the respondents.

Please note that an agency may not conduct or sponsor, and an individual need not respond to, a collection of information unless it displays a valid OMB Control Number.

It is our policy to make all comments available to the public for review at the location listed in the **ADDRESSES** section. Before including your address, phone number, email address or other personally identifiable information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Continuation of follow-up years for ascertainment of medical history update forms will provide essential data for outcomes assessment for this population of aging women.
