#### SUPPLEMENTARY INFORMATION:

##### I. Determination Regarding Southwest Research Institute

Southwest Research Institute (SWRI) requested OSHA to delete a test standard, UL 60950—Information Technology Equipment (see Exhibit OSHA-2006-0041-003), from its scope of recognition. Subsection II.D of Appendix A to 29 CFR 1910.7 provides that OSHA must inform the public of such a reduction in scope. Accordingly, OSHA hereby notifies the public that it is deleting UL 60950 from SWRI's scope of recognition as of May 30, 2013. As of May 30, 2013, OSHA will no longer accept certifications by SWRI that products conform to UL 60950, and OSHA will delete UL 60950 from SWRI's scope of recognition on the OSHA Web page.

SWRI must notify those NRTL clients for which SWRI certified that products conformed to UL 60950 that SWRI's scope of recognition no longer includes UL 60950. SWRI's notification to each affected client also must inform the client that it must now obtain its product certification services, with respect to UL 60950, from an NRTL with a scope of recognition that continues to include UL 60950. SWRI's notification to each affected client must be in writing and received by the client within two weeks of the date of this Notice.

#### SUPPLEMENTARY INFORMATION:

*Title of Collection:* "National Sciences Foundation Proposal/Award Information-Grant Proposal Guide".

*OMB Approval Number:* 3145-0058.

*Type of Request:* Intent to seek approval to extend with revision an information collection for three years.

*Proposed Project:* The National Science Foundation Act of 1950 (Pub. L. 81-507) set forth NSF's mission and purpose:

"To promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense. . . ."

The Act authorized and directed NSF to initiate and support:

- Basic scientific research and research fundamental to the engineering process;

- Programs to strengthen scientific and engineering research potential;
- Science and engineering education programs at all levels and in all the various fields of science and engineering;
- Programs that provide a source of information for policy formulation; and
- Other activities to promote these ends.

Over the years, NSF's statutory authority has been modified in a number of significant ways. In 1968, authority to support applied research was added to the Organic Act. In 1980, The Science and Engineering Equal Opportunities Act gave NSF standing authority to support activities to improve the participation of women and minorities in science and engineering.

Another major change occurred in 1986, when engineering was accorded equal status with science in the Organic Act. NSF has always dedicated itself to providing the leadership and vision needed to keep the words and ideas embedded in its mission statement fresh and up-to-date. Even in today's rapidly changing environment, NSF's core purpose resonates clearly in everything it does: promoting achievement and progress in science and engineering and enhancing the potential for research and education to contribute to the Nation. While NSF's vision of the future and the mechanisms it uses to carry out its charges have evolved significantly over the last four decades, its ultimate mission remains the same.

Use of the Information: The regular submission of proposals to the Foundation is part of the collection of information and is used to help NSF fulfill this responsibility by initiating and supporting merit-selected research and education projects in all the scientific and engineering disciplines. NSF receives more than 51,000 proposals annually for new projects, and makes approximately 10,500 new awards.

Support is made primarily through grants, contracts, and other agreements awarded to more than 2,000 colleges, universities, academic consortia, nonprofit institutions, and small businesses. The awards are based mainly on evaluations of proposal merit submitted to the Foundation.

The Foundation has a continuing commitment to monitor the operations of its information collection to identify and address excessive reporting burdens as well as to identify any real or apparent inequities based on gender, race, ethnicity, or disability of the

proposed principal investigator(s)/ project director(s) or the co-principal investigator(s)/co-project director(s).

*Burden on the Public:* The Foundation estimates that an average of 120 hours is expended for each proposal submitted. An estimated 51,000 proposals are expected during the course of one year for a total of 6,120,000 public burden hours annually.
