IV. Emerging Resistance to Antibacterial Drugs

In addition to facilitating antibacterial drug development, the task force recognizes the need to address the issue of emerging drug resistance. The public health need caused by the lack of a robust pipeline is further compounded by the diminishing effectiveness of currently available antibacterial drugs due to emerging drug resistance. Therefore, we are seeking comment on strategies to preserve the utility of antibacterial drugs.

V. Categories for Public Comment

We request the following information from the public:

- Novel study designs to expedite the development of new antibacterial drugs;
- Comments on our prioritized list of proposed draft or final guidance development; and
- Potential strategies intended to slow the rate of emerging drug resistance.

When responding to this notice, please include the category or categories that your response addresses.

VI. Comments

Interested persons may submit either electronic comments to <http://www.regulations.gov> or written comments regarding this document to the Division of Dockets Management (see ADDRESSES). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. When responding, include the category or categories that your response addresses as listed in section V of this document. Received comments may be seen in the Division of Dockets
